

CRE™ RX Biliary Balloon Dilatation Catheter

Boston Scientific
Advancing science for life™

Dilatation Assisted Stone Extraction (DASE)
for removal of difficult biliary stones

5.5cm Length

3cm Length

“The 5.5cm balloon works well now, but the 3cm length is optimal to more precisely dilate the bile duct sphincter while maintaining a stable view of the papilla.”

-Dr. Rajesh Keswani, Northwestern University

New 3cm Balloon

A shorter length balloon option, in addition to 5.5cm balloon

RX Shortwire Compatible

Helps enable physicians to maintain control of guidewire and lock the device, no preloaded guidewire to remove

Contrast Injection Port

For convenience and fluoroscopic visualization

CRE™ RX Biliary Balloon Dilatation Catheter

CRE™ Fixed, CRE Wireguided, CRE PRO Wireguided, and CRE RX Biliary Balloon Dilatation Catheters provide consistent performance for balloon endoscopy to help enable optimal control, efficiency and performance.

The CRE™ RX Biliary Balloon Dilatation Catheters are indicated for use in adults for endoscopic dilatation of the Sphincter of Oddi with or without prior sphincterotomy. The CRE RX Biliary Balloon Dilatation Catheters may be used for injection of contrast medium for fluoroscopic visualization of the bile ducts.

Built on the Foundation of CRE Legacy Design

Platinum Iridium Radiopaque Markers

Facilitates positioning and enhances visualization under fluoroscopy.

Pebax™ Balloon Material

Designed to produce three distinct diameters at three separate pressures during *in vivo* dilation.

Rounded Balloon Shoulders

Designed to facilitate visualization of dilation through balloon
