

With TruSelect you can get closer to the tumor for more selective segmentectomies.

- 2.0 F outer diameter enables you to access small distal vessels, getting closer to the tumor
- 0.021" inner diameter provides comparable flow to 2.4 F catheters and is large enough to deliver Y-90 microspheres
- Designed with an optimal balance of pushability and flexibility, providing excellent trackability

TheraSphere™ Yttrium-90 Glass Microspheres

TheraSphere* Yttrium-90 Glass Microspheres

INDICATION FOR USE: TheraSphere is indicated for use as selective internal radiation therapy (SIRT) for local tumor control of solitary tumors (1-8 cm in diameter), in patients with unrescatable hepatosciellus cracinoma (MCC), Child- Pugh Score A cirrhosis, well-compensated liver function, no macrovascular invasion, and good performance status. CONTRAINDICATIONS: TheraSphere is contraindicated in patients: whose Tc-99m macroaggregated albumin (MAA) hepatic arterial perfixions scrintigraphy shows any deposition to the gastrointestinal tract that may not be corrected by angiographic techniques - who show shunting to blood to the lungs greater than 30 (or 16 (GR) of 16 (GR) of 19 (GR) of INDICATION FOR USE: Thera Sphere is indicated for use as selective internal radiation therapy (SIRT) for local tumor control of solitary tumors (1-8 cm in diameter), in patients

TheraSphere is a registered trademark of Theragenics Corporation used under license by Biocompatibles UK Ltd., a wholly owned subsidiary of Boston Scientific Corporation.

Truselect™ Microcatheter

Truselect Microcatheter

CAUTION: Federal law (USA) restricts this device to sale by or on the order of a physician. Rx only. Prior to use, please see the complete "Directions for Use" for more information on Indications, Contraindications, Warnings, Precautions, Adverse Events, and Operator's Instructions. INTENDED USE: The TRUSELECT Microcatheters are intended for peripheral vascular use. The microcatheter can be used for selective infusion of diagnostic, embolic, or therapeutic materials into the vessel. CONTRAINDICATIONS: None known. WARNINGS: Never advance or withdraw an intravascular device against resistance until the cause resistance is determined by fluoroscopy. Movement of the microcatheter or guidewire against resistance may result in damage or separation of the microcatheter or guidewire tip, or vessel perforation. ◆ TRUSELECT™ Microcatheter is not intended for use in the coronary vasculature or neurovasculature. PRECAUTIONS: This device should be used only by physicians thoroughly trained in percutaneous, intravascular techniques and procedures. ◆ Diagnostic, embolic, or therapeutic agents are to be used in accordance with specifications outlined by the manufacturer. ◆ Because the microcatheter may be advanced into narrow sub-selective vasculature, repeatedly assure that the microcatheter has not been advanced so far as to interfere with its removal. ADVERSE EVENTS:
The Adverse Events include, but are not limited to: Allergic reaction (to drug, contrast, device or other) ◆ Cerebrovascular accident (CVA), stroke, transient ischemic attack (TIA)

• Death • Embolism (air, plaque, thrombus, device or other) • Hemorrhage/Hematoma • Infection/sepsis • Need for urgent intervention or surgery • Thrombus/thrombosis • Vasospasm • Vessel occlusion • Vessel trauma (perforation, injury, rupture, dissection, pseudoaneurysm) 92567338 A.1
