

ZIPwire™

Nitinol Hydrophilic Guidewire

**A smooth hydrophilic guidewire
preferred for tortuous anatomy.¹**

ZIPwire™

Nitinol Hydrophilic Guidewire

Impacted stones. Tortuous anatomies. Ureteral obstructions.^{1,2}

Medical conditions like these call for a hydrophilic guidewire that's up to the task.¹ Our ZIPwire Nitinol Hydrophilic wire has a kink-resistant core with a proprietary polymer jacket and a lubricious coating to support smooth ureteral access. Its excellent rotational torque³ response enables a smooth response for maximum control. With the flexible hydrophilic design of the ZIPwire Guidewire, you have the power to navigate past obstructions and facilitate successful outcomes – even when faced with challenging cases.^{1,2}

Lubricious, Floppy Tip

Designed for reduced trauma to the ureter during advancement through the urinary tract

Multiple Tip Options

Available in multiple tip configurations, including the Bentson-type tip designed to provide the additional tip flexibility for negotiation of narrowed ureters and access beyond obstructions

Stiff and Standard Shafts

The Stiff ZIPwire Guidewire is designed to increase pushability, help straighten tortuous anatomy and facilitate advancement of devices²

Hydrophilic Coating

Designed to navigate ureteral strictures and facilitate tracking of urological instruments

Excellent Rotational Torque

Enables a smooth response for maximum control

Nitinol Core

Offers a kink-resistant shaft for enhanced control

Highly Radiopaque Jacket

Designed to provide enhanced visibility under fluoroscopy and enable accurate positioning

Torque Vise

May be used for added guidewire steerability and manipulation

ZIPwire™ Nitinol Hydrophilic Guidewire

Order Number	Diameter	Length	Tip	Taper
Standard Shaft				
M0066802001	0.018 in	150 cm	Straight	3 cm
