

# NaviGuide™ Percutaneous Access Needle

Now there's a new way to help reduce the complexity in achieving precise access for removing challenging renal stones.

The NaviGuide Needle's enhanced design is intended to complement widely taught percutaneous access techniques specifically for urologists gaining access when performing percutaneous nephrolithotomy (PCNL) procedures.

Discover a level of convenience, accuracy and control in a PCNL needle.

## Convenience.

One needle for your PCNL procedures. Precisely track and guide placement using fluoroscopic or ultrasound imaging.

## Accuracy.

Set the **adjustable slider using the markings on the needle** to assist with depth control and provide an aid to limit overshooting. A **radiopaque ring** in the slider is a visual aid for the bull's-eye approach.

## Control.

The NaviGuide Needle puts control in your hands. With a **dedicated gripping area for forceps** and **range of needle lengths to size to your patient**, it's designed to improve control of the needle during advancement. The **locking hub** keeps the needle securely connected until removal.

## Ordering Information

UPN	GTIN	Product Description	Size (Gauge)	Length (cm)
M0067001310	08714729953364	NaviGuide Percutaneous Access Needle	18	12
