

Agile™

Esophageal Fully and Partially Covered Stent System

Featuring a Through-the-Scope
Delivery System for 14mm and
18mm Diameter Stents

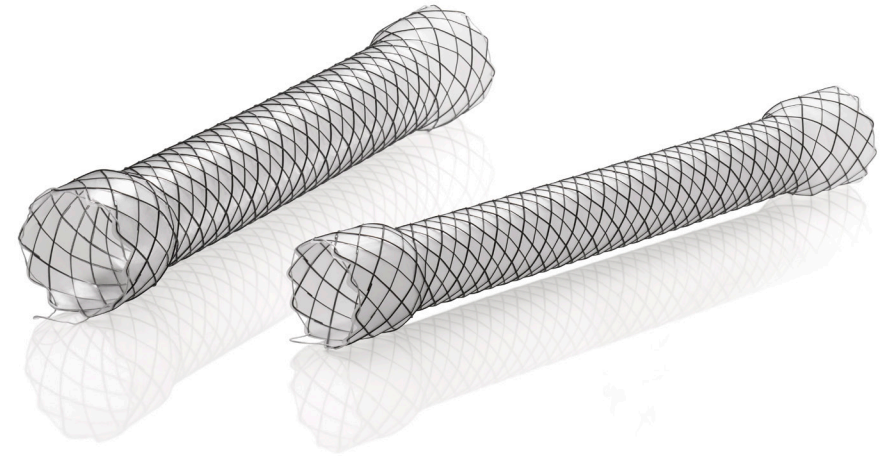

About Agile™

The Agile Esophageal Stent System offers a flexible and conformable self-expanding metal stent on a through the scope delivery system for 14mm and 18mm sizes, which enables direct visualization during deployment and may help minimize reliance on fluoroscopy. The 23mm is provided on the trusted WallFlex™ Esophageal over-the-wire delivery system. The Agile portfolio is offered in fully covered and partially covered designs.

- Offering a wide range of sizing options including a 60mm length and 14mm diameter designed to meet a variety of clinical needs, all size configurations are offered in fully covered and partially covered options.
- Braided dual gauge nitinol wire provides an implant that is more flexible and conformable.*
- Atraumatic looped ends to help minimize risk of trauma
- Retrieval suture on both ends of stent
- Tissue In-Growth Prevention—The silicone covering extends the entire length of the Fully Covered Agile Esophageal Stent and is designed to address tumor ingrowth.

*Compared to WallFlex™ Esophageal 18mm and 23mm stent diameters. WallFlex Esophageal is not available in a 14mm stent diameter for direct comparison.

Delivery System

Through-the-Scope design

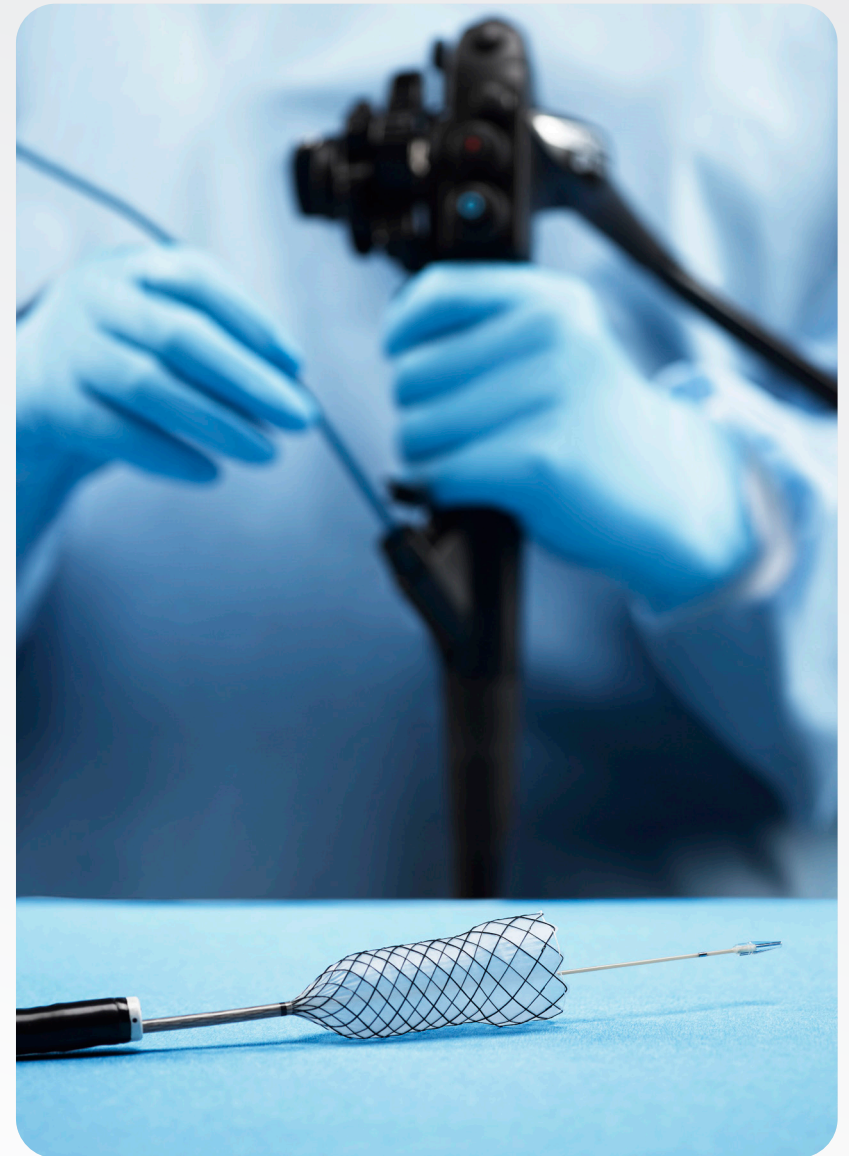

- For 14mm and 18mm stents, the through-the-scope delivery system provides direct visualization to aid physicians in stent placement accuracy and help minimize fluoroscopic dependence
- Designed to offer flexibility and trackability to enhance physician control
- Low profile delivery system. Compatible with a 3.7mm working channel, designed to navigate through tight strictures

5 radiopaque markers

Markers signal the ends of the stent, the midpoint of the stent, and the point if which the stent can no longer be recaptured, aiding in deployment

Reconstrainability

In the event that the stent is not exactly where a physician intends it to be, the stent can be recaptured up to 2x and redeployed

Ordering Information

The Agile Esophageal Stent System is intended for maintaining esophageal luminal patency in esophageal strictures caused by intrinsic and/or extrinsic malignant tumors and occlusion of concurrent esophageal fistulas.
