This document is not a reflection of the Center for Medicare and Medicaid Services (CMS) official General Equivalence Mapping (GEM) for ICD-9-CM procedure classification to ICD-10-PCS. There is not a simple "crosswalk from I-9- to PCS" in the GEM files. The GEM file is an official CMS reference mapping that attempts to include all valid relationships between the codes in the ICD-9-CM procedure classification and the ICD-10 Procedure Code System (ICD-10-PCS). Although helpful for review, the GEM translation should not replace coding from the official medical record and assigning the appropriate ICD-10 code based on the individual case record. The translations provided in this document were derived from coding directly using ICD-10-PCS coding resources making use of the increased specificity in PCS. Therefore, the translations provided are not an exact match to the CMS GEM files and are not based on any official CMS resource. The most accurate coding for ICD-10-PCS should be based on access to the individual medical record to see the specific nature of the procedure and assign the correct PCS code(s) to the record.
