

SKIP THE WAIT.

Why wait for a device expert to arrive on site when you can complete device checks in real time?* The Heart Connect System streamlines your process by enabling your team to instantly share programmer screen information with other health care providers or your Boston Scientific representatives. It's a smart step toward improving patient outcomes and lowering the cost of health care delivery.

*Variations in location and quality of local network access points and related network infrastructure, and of Internet infrastructure and Internet service providers, can affect the quality and responsiveness of audio, video, and medical device display information shared in an online meeting.

Model 3300 Heart Connect™ System

INTENDED USE The Heart Connect System is an optional data-sharing system intended to display and share physiological and/or other medical data from the Model 3300 Programmer.
