

## MaxForce TTS™ Esophageal High Performance Balloon Dilatation Catheter

## CRE™ Fixed and Wireguided Balloon Dilatation Catheters

## CRE PRO Wireguided Balloon Dilatation Catheter

### FEATURES

- One size balloon

- Pebax material for 3 distinct dilation diameters with little-to-no balloon waisting
- Profile designed for improved scope compatibility
- Rounded shoulders to facilitate visualization of stricture

- Identical to the CRE Wireguided Balloon Dilatation Catheter, **PLUS platinum iridium RO markers** for fluoroscopic visualization and to facilitate proper positioning within a stricture

### APPLICATIONS

- Esophageal dilation

- Fixed wire balloon dilation catheters for esophageal dilation
- Wireguided balloon dilatation catheters for esophageal, pyloric and colonic dilation

- Esophageal, pyloric, colonic **and biliary** dilation
- First and currently the only balloon dilation catheter **indicated for use in the DASE** (dilation assisted stone extraction) procedure for removal of difficult biliary stones

### ECONOMIC BENEFITS

- Low cost option

- One balloon provides dilatation at 3 distinct sizes, which may reduce the need for additional balloons per procedure
- Available in a wide variety of sizes

- DASE may be an alternative to other complex stone management procedures (laser or electrohydraulic lithotripsy) and may help prevent the need for repeat ERCP
- Decreased inventory requirements; one balloon with many “anatomical” indications
