“So it really is a testament to how well designed the product was and the fact that it day in, day out helps you accomplish what you need to accomplish endoscopically. **It gets you the access** that you need safely. It gives you the dynamics that **help you dilate and get to the stone**, and it maintains your access in an atraumatic fashion. It really was a well-designed product and that’s why it’s been the **go-to wire** for a lot of urologists **for over a decade now.**”

Harrison Mitchell Abrahams, MD
USMD Health Systems, Arlington, TX

“We believe that to achieve safe access to the urinary system, the Sensor Dual Flex Guidewire might be preferable because of its non-injurious tip and more lubricious shaft.”

Liguori G, Antonioli F, Trombetta C, et al. Comparative experimental evaluation of guidewire use in urology. *Urology*. 2008 Aug;72(2):286-9.

“The more flexible tip of the Sensor may provide an advantage for maneuvering around occluding obstructions in tight spots.”
