## Introduction

The Reference Guide provides the list of Directions for Use (DFU) available for each Boston Scientific Spinal Cord Stimulator System. These manuals are designed for clinicians and other health care providers.

**IMPORTANT:** Please note that only the Directions for Use that are appropriate for your region will be provided with your SCS system.

Additional information may be provided in addendums to these DFUs.

## How to Use this Reference Guide

In this Reference Guide, DFUs are listed for each Spinal Cord Stimulator System in a table format. Follow the instructions below to find information for your SCS system:

1. Find the appropriate table for your SCS system. For example, if you are using a Precision Spectra™ System, find the table labelled "Precision Spectra Directions for Use".
2. Use the highlighted rows to locate the information of interest to you (e.g. indications, implantable pulse generator, or programming). The DFU containing this information is listed below.

The Boston Scientific DFUs are provided either online (as directed in your product packaging) or with your SCS system.
