

# LASER PRECISION. NO INCISION.

Simulated surgical procedure.

## Words every man wants to hear when it comes to treating his BPH.

The symptoms of enlarged prostate like frequent urination and weak stream are frustrating and inconvenient. That's why we offer GreenLight™ Laser Therapy—a minimally invasive option for the treatment of enlarged prostate. The advanced laser technology typically allows for precise and targeted treatment in an outpatient procedure that may eliminate the need for ongoing medication for BPH.

GreenLight™ Laser Therapy

The GreenLight™ Laser System is intended for removal of soft tissue, including vaporization of the prostate for benign prostatic hyperplasia (BPH). Potential risks may include irritative symptoms, bleeding, retrograde ejaculation, and urinary tract infections. You should talk with your doctor about benefits and risks before moving forward with any treatment option.
