**GreenLight XPS™ Laser Therapy System**

**Enlightened questions. A proven answer.**

**The challenge**
Benign prostatic hyperplasia (BPH) prevents millions of men from living life to the fullest. Unfortunately, drug therapy doesn’t always work or may have side effects, and transurethral resection of the prostate (TURP) can’t be used to treat all BPH patients.

**The solution**
GreenLight® Laser Therapy was designed to be a safe, effective, easy-to-learn BPH treatment. It is grounded in advanced science and proven in a head-to-head trial. When compared to TURP, it has fewer adverse events, shorter recovery and lower overall hospital costs.10,11

**How do I elevate the experience for all of my patients?**

**Urologist’s #1 choice for laser BPH therapy**

**How do I optimize clinical outcomes?**

**How do I lower the overall cost of care?**
