How Can I Start or Stop Stimulation?

To get started, press the “unlock” button on the right-hand side of your remote.

Now you can turn stimulation on by pressing the red button in the center of your remote.

To turn stimulation off, simply press the red button again.
How Can I Increase or Decrease Stimulation?

If your doctor allows you to change your stimulation level, this is easily done on your remote:

First click the right-hand arrow to see the main menu.

Then select “stimulation”.

You can then use the “plus” or “minus” buttons beside the on/off button to adjust your stimulation to the right level for you.
How Can I Access or Change Stimulation Programs?

If your doctor has set up different stimulation programs for you, you can access these in just a few clicks:

EITHER: press the “Programs” button on the left side of your remote.
Select your desired program by clicking on the right hand arrow one last time.

OR: Click the right-hand arrow to see the main menu.

Click the right-hand arrow a second time to enter the “Programs” menu.

Click the right-hand arrow a third time to enter the “Change Program” menu.

From there you can navigate through the different programs with the up and down arrows.
How Can I Charge My Remote?

To charge your remote, simply connect it to the **USB power supply** and plug into a **plug socket**.

Whenever the remote is **low on battery**, it will show you a reminder to recharge.
