

Please join us for a Boston Scientific press event

Shake me and save me!

Protection from sudden cardiac death,
just under the skin:
the EMBLEM™ Subcutaneous ICD System

We would like to invite you
to our press event
on June 23, 2015
dedicated to an innovative,
life-saving technology,
called EMBLEM™
Subcutaneous ICD System,
for those who are at risk
of sudden cardiac death.

Sudden cardiac death claims more than 350,000 lives every year in Europe. This event will be an opportunity to hear from key opinion leaders about the therapy and how patients can benefit from subcutaneous implantable defibrillators.

The event will be held during EHRA EUROPACE - CARDIOSTIM 2015, the official congress of the European Heart Rhythm Association, in Milan, Italy.

We are looking forward to welcoming you in Milan and we will be in touch in the next few weeks to share more details.
