

## How to use Boston Scientific's C-Code Finder

You are able to search the C-Code Finder by seven different criteria. You can also search by a full name/number or partial; the finder will deliver you results for both.

The seven criteria are:

1. UPN or Universal Product Number
2. Boston Scientific Product Name or Description
3. C-Code
4. C-Code Description
5. Boston Scientific Catalog Number
6. Product Category (stent, catheter, balloon, etc.)
7. Medical Specialty (broad categories)

Find Boston Scientific products and their corresponding C-Codes! Search by your choice of seven criteria, then print or download your results into a .pdf file or a .csv file for your reference.

C-codes are required by Medicare on claims where procedures are billed under the Outpatient Prospective Payment System (OPPS). They are used to track the types of devices used during applicable outpatient procedures and to ensure that both procedures and devices are appropriately billed. Claims can be returned if the primary device required for the procedure is not included on the same claim. Separate device reimbursement is not driven by C-code use.

Select Search Criteria

- UPN
- Product Name or Description
- C-Code
- C-Code Description
- Catalog Number
- Product Category
- Medical Specialty

PLEASE NOTE: Health economic and reimbursement information provided by Boston Scientific Corporation is gathered from third-party sources and is subject to change without notice as a result of complex and frequently changing laws, regulations, rules and policies. This information is presented for illustrative purposes only and does not constitute reimbursement or legal advice. Boston Scientific encourages providers to submit accurate and appropriate claims for services. It is always the provider's responsibility to determine medical necessity, the proper site for delivery of any services and to submit appropriate codes, charges, and modifiers for services that are rendered. Boston Scientific recommends that you consult with your payers, reimbursement specialists and/or legal counsel regarding coding, coverage and reimbursement matters. Boston Scientific does not promote the use of its products outside their FDA-approved label.

In this example, we will choose from the dropdown: "Product Category", then type in "stent" in the search box:
