

Uphold™ LITE Vaginal Support System

2015 Coding & Quick Reference Guide

Hospital Outpatient Coding Scenarios

*This guide contains specific information for two (2) common coding/reimbursement scenarios related to the use of the Uphold LITE Vaginal Support System when performed in a **hospital outpatient setting**. Click on the links below for the information most relevant to your needs:*

NOTE: CPT® Code 57282 (Colpopexy, vaginal; extra-peritoneal approach) is not eligible for reimbursement in an ASC setting according to CMS' "List of Approved ASC Procedures". Therefore, ASC reimbursements are not reflected in this guide.

- [**PHYSICIAN SERVICES**](#)
- [**HOSPITAL OUTPATIENT FACILITY**](#)
(including Medicare Pass-Through Codes – aka "HCPCS" or "C-Codes")

Payer policies will vary and should be verified prior to treatment for limitations on diagnosis, coding or site of service requirements. The coding options listed within this guide are commonly used codes and are not intended to be an all-inclusive list. We recommend consulting your relevant manuals for appropriate coding options.

Reimbursement amounts provided in this guide are based on 2015 Medicare national average allowed amounts and will vary geographically and/or by individual facility.

Proper medical record documentation is critical to ensure appropriate reimbursement from all payers. The medical record must specifically support all procedures and diagnoses billed.

PHYSICIAN Coding & Reimbursement (PFS)

CODING, PHYSICIAN RELATIVE VALUE UNITS (RVUs) & MEDICARE REIMBURSEMENT

All procedures are listed in order of highest to lowest total Physician facility-based relative value units (RVU). Physician allowed amounts for secondary procedures reflect a 50% reduction with the exception of the mesh insertion code (CPT Code 57267) which is paid at 100% as an “Add-On” code based on Medicare’s Multiple Procedure Payment Reduction policy. RVUs reflect the full RVU values for each CPT code listed.

CPT® Code	Code Description	Medicare Rates (National Average)	**Medicare RVUs (Facility-based) ^{1,2}			TOTAL RVUs
		2015 Physician ^{1,2} Allowed Amount	Work	Practice Expense	Malpractice	
Scenario #1: “Repair of Apical Prolapse with Cystocele and Mesh Insertion (No Sling Procedure)”						
57240	Anterior colporrhaphy, repair of cystocele with or without repair of urethrocele	\$682	11.50	6.18	1.42	19.10
57282	Colpopexy, vaginal; extra-peritoneal approach	\$254	7.97	5.27	0.98	14.22
*57267	Insertion of mesh or other prosthesis for repair of pelvic floor defect, each site (anterior, posterior compartment), vaginal approach (List separately in addition to code for primary procedure)	\$261	4.88	1.84	0.59	7.31
TOTALS:		\$1,197	24.35	13.29	2.99	40.63
Scenario #2: “Repair of Apical Prolapse with Cystocele and Mesh Insertion, with Sling Procedure”						
57288	Sling operation for stress incontinence (e.g., fascia or synthetic)	\$729	12.13	6.79	1.46	20.38
57240	Anterior colporrhaphy, repair of cystocele with or without repair of urethrocele	\$341	11.50	6.18	1.42	19.10
57282	Colpopexy, vaginal; extra-peritoneal approach	\$254	7.97	5.27	0.98	14.22
*57267	Insertion of mesh or other prosthesis for repair of pelvic floor defect, each site (anterior, posterior compartment), vaginal approach (List separately in addition to code for primary procedure)	\$261	4.88	1.84	0.59	7.31
TOTALS:		\$1,585	36.48	20.08	4.45	61.01

*According to AMA-CPT instruction, use CPT Code 57267 in conjunction with CPT Codes 45560, 57240-57265, 57285.

**There are no current Medicare valuations for the above CPT Codes for the physician office setting.

NOTE: Additional coding/reimbursement guides, including [Pelvic Floor Repair Procedures-Transvaginal](#) and [Sling Procedures](#), are available on the Boston Scientific reimbursement [webpage](#).

FACILITY Coding & Reimbursement

Hospital Outpatient-OPPS

CODING, APC RELATIVE WEIGHTS & MEDICARE REIMBURSEMENT

Comprehensive APCs (C-APCs), originally implemented by CMS in 2014, were created with the goal of identifying certain high-cost device-related hospital outpatient procedures. CMS has fully implemented this policy and has identified these high-cost, device-related procedures as the primary service on a claim. All other services reported on the same claim will be considered “adjunct services” provided to support the delivery of the primary service and are unconditionally packaged into the OPPS payment of the primary service. Private payer reimbursement policies may differ.

CPT® Code	Description	APC Code	Medicare Rates (National Average)	Medicare OPPS Relative Weight
			2015 Hospital Outpatient ^{2,3} Allowed Amount	APC Relative Weight ^{2,3}
Scenario #1: “Repair of Apical Prolapse with Cystocele and Mesh Insertion (No Sling Procedure)”				
57282	Colpopexy, vaginal; extra-peritoneal approach	0202	\$3,979	53.6473
57240	Anterior repair, cystocele	0202	\$0	C-APC Packaging
57267	Insertion of mesh (ADD-ON CODE)	n/a	No Separate Reimbursement (See Note Below)	
TOTALS:			\$3,979	
Scenario #2: “Repair of Apical Prolapse with Cystocele and Mesh Insertion, with Sling Procedure”				
57282	Colpopexy, vaginal; extra-peritoneal approach	0202	*\$6,825	*92.0148 (Reassigned to APC 0385)
57288	Sling operation for stress incontinence (e.g., fascia or synthetic)	0202		
57240	Anterior repair, cystocele	0202	\$0	C-APC Packaging
57267	Insertion of mesh (ADD-ON CODE)	n/a	No Separate Reimbursement (See Note Below)	
TOTALS:			\$6,825	Reimbursement reflects C-APC Complexity Adjustment
<p>NOTE: As of January 2014, Medicare expanded their Packaging Policy (bundling), for hospital outpatient facilities and ambulatory surgical centers, to include most Add-on codes. Reimbursement for these services is now included in the facility’s reimbursement for the primary procedure. CPT code 57267 (mesh insertion) is one of the “Add-on” codes affected by this policy change and is no longer separately reimbursed under the Medicare OPPS/ASC payment system. Private payer reimbursement policies may differ.</p>				
<p>For Medicare cost reporting purposes, we encourage hospitals to continue to report CPT code 57267 (Mesh insertion) along with the applicable HCPCS/C-code. This change does NOT apply to physician coding/reimbursement of mesh insertion under Medicare.</p>				

*Payment reflects APC reassignment based on CMS’s policy for C-APC “Complexity Adjustment” (2015 OPPS-Addendum J).

For additional SUI & PFR coding exceptions to CMS’s C-APC and “Complexity Adjustment” policy reference our online guide titled CMS Comprehensive APC & Complexity Adjustment Coding Scenarios- Hospital Outpatient Facilities available on the Boston Scientific reimbursement [webpage](#).

FACILITY Coding & Reimbursement (continued)

Hospital Outpatient-OPPS

MEDICARE PASS-THROUGH CODES (“C-CODES”) FOR SELECT PELVIC FLOOR REPAIR DEVICES:

- C-codes are ONLY for use by hospital outpatient facilities, under the Medicare program. Medicare requires hospitals to use “C-codes” to report devices on claims when such devices are used in conjunction with procedure(s) billed and paid for under the OPPS in order to improve the claims data used annually to update the OPPS payment rates. The codes below, while no longer paid separately, are still important to report on outpatient hospital claims. Hospitals will continue to be paid for outpatient care using ambulatory payment classification (APC) rates based on procedures performed, and not on C-codes.
- It is important to charge appropriately for device-related procedures because hospital’s charging practices will determine adequacy of future Medicare hospital outpatient rates. Medicare sets new hospital outpatient rates using hospital claims data from prior years. When hospitals fail to include appropriate device charges on the claim, this reduces future payment rates because the device-related costs are not captured for that service. As a result, it is important for hospitals to accurately reflect all procedure costs in insurance claims charges, including device cost, using the appropriate C-code, where applicable in conjunction with revenue code 278 Medical/Surgical Supplies and Devices - Other Implant.

C-code	Code Description	Device Impacted
C1763	Connective Tissue, nonhuman (includes synthetic)	Uphold™ LITE Vaginal Support System
C1771	Repair device, urinary, incontinence, with sling graft	Advantage™ System (Transvaginal) Advantage Fit™ System (Transvaginal) Lynx™ System (Suprapubic) Obtryx™ System Halo or Curved (Transobturator) Obtryx II System Halo or Curved (Transobturator) Prefyx PPS™ System (Pre Pubic) Solyx™ SIS System (Single Incision)
C2631	Repair device, urinary, incontinence, without sling graft	Capio™ and Capio CL Suture Capturing Device Capio SLIM Suture Capturing Device

For additional online information related to CMS Pass-Through Codes (aka, HCPCS or C-codes) as well as a comprehensive list of Boston Scientific Urology and Women’s Health products with C-Codes, see our [Urology and Women’s Health C-code Guide](#) available on our Boston Scientific reimbursement [webpage](#).
