Payer policies will vary and should be verified prior to treatment for limitations on diagnosis, coding, or site of service requirements. The coding options listed within this guide are commonly used codes and are not intended to be an all-inclusive list. We recommend consulting your relevant manuals for appropriate coding options.

**Diagnosis Coding**

<table>
<thead>
<tr>
<th>ICD-10 CM Diagnosis Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>J45.50</td>
<td>Severe persistent asthma, uncomplicated</td>
</tr>
</tbody>
</table>

**Medicare Physician and Hospital Outpatient Payments**

<table>
<thead>
<tr>
<th>CPT® Code¹</th>
<th>Code Description</th>
<th>Work</th>
<th>Total Office</th>
<th>Total Facility</th>
<th>In-Office</th>
<th>In-Facility</th>
<th>Hospital Outpatient</th>
<th>ASC</th>
</tr>
</thead>
<tbody>
<tr>
<td>31660</td>
<td>Bronchoscopy, rigid or flexible, including fluoroscopic guidance, when performed; with bronchial thermoplasty, 1 lobe</td>
<td>4.00</td>
<td>NA</td>
<td>5.66</td>
<td>NA</td>
<td>$203</td>
<td>$4,383†</td>
<td>N/A*</td>
</tr>
<tr>
<td>31661</td>
<td>Bronchoscopy, rigid or flexible, including fluoroscopic guidance, when performed; with bronchial thermoplasty, 2 or more lobes</td>
<td>4.25</td>
<td>NA</td>
<td>5.97</td>
<td>NA</td>
<td>$214</td>
<td>$4,383†</td>
<td>N/A*</td>
</tr>
</tbody>
</table>

*See important notes on the uses and limitations of this information on page 2.

**C-Code Information**

For all C-Code information, please reference the C-code Finder: [www.bostonscientific.com/reimbursement](http://www.bostonscientific.com/reimbursement)

On claims for Medicare beneficiaries, hospitals should report not only the appropriate CPT® Code, but also C-Code C1886.

- C-Codes are tracking codes established by the Centers for Medicare & Medicaid Services (CMS) to assist Medicare in establishing future APC payment rates. C-Codes only apply to Medicare hospital outpatient claims. They do not trigger additional payment to the facility today.
- It is very important that hospitals report C-Codes as well as the associated device costs. This will help inform and potentially increase future outpatient hospital payment rates.

**Suggested Revenue Codes**

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>278†</td>
<td>Medical/surgical supplied and devices/other implants</td>
</tr>
<tr>
<td>272</td>
<td>Sterile supply/medical/surgical supplies and devices</td>
</tr>
</tbody>
</table>
The Category I CPT® Codes 31660 and 31661 for BT are not currently on the “ASC Covered Surgical Procedures” for CY 2017 and therefore this procedure is not covered in the ASC setting for Medicare patients. ASCs should contact commercial payers to determine whether the procedure would be covered in this setting.

Note: The Instructions for Use for the Alair System specify that facilities should be equipped with access to full resuscitation equipment to handle hemoptysis, pneumothorax, and other respiratory complications, including acute exacerbation of asthma and respiratory failure requiring intubation.

**Coverage**

The Alair™ System is FDA approved, and some payers are covering the procedure while others are reviewing the technology for coverage. Providers should contact their individual payers prior to performing the procedure for information on coverage.

Medicare includes Bronchial Thermoplasty as part of a covered benefit category and has approved the procedure for qualified patients nationwide, but does not have a formal written coverage policy for the procedure. Healthcare facilities and physicians treating patients who have Medicare coverage will need to submit a claim to their local Medicare contractor.

Boston Scientific recommends pre-authorization of benefits for BT with third-party payers who do not cover BT but will allow a pre-authorization of benefits. Boston Scientific offers support for providers in working through the pre-authorization process in instances where consistent formal coverage has yet to be established. Customers performing BT delivered by the Alair System can contact the Pre-Authorization Support Program (PSP) for pre-authorization and appeal support.

**Pre-Authorization Support Program (PSP) Contact Information:**

- 1-844-693-7402 (phone)
- 1-844-693-7403 (fax)

Health economic and reimbursement information provided by Boston Scientific Corporation is gathered from third-party sources and is subject to change without notice as a result of complex and frequently changing laws, regulations, rules and policies. This information is presented for illustrative purposes only and does not constitute reimbursement or legal advice. Boston Scientific encourages providers to submit accurate and appropriate claims for services. It is always the provider’s responsibility to determine medical necessity, the proper site for delivery of any services and to submit appropriate codes, charges, and modifiers for services that are rendered. Boston Scientific recommends that you consult with your payers, reimbursements specialists and/or legal counsel regarding coding, coverage and reimbursement matters. Boston Scientific does not promote the use of its products outside their FDA-approved label. Caution: Federal (U.S.) law restricts this device to sale by or on the order of a physician. Indications, contraindications, precautions, and warnings can be found with product labeling.

* The 2017 National Average Medicare physician payment rates have been calculated using a 2017 conversion factor of $35.8887. Rates subject to change.

** For Medicare claims, please note that CPT Codes 31660 and 31661 map to Ambulatory Payment Classification (APC) 5155, Level 5 Airway Endoscopy.

† Comprehensive APCs (C-APCs): In 2014, CMS implemented their C-APC policy with the goal of identifying certain high-cost device-related outpatient procedures (formerly “device intensive” APCs). CMS has fully implemented this policy and has identified these high-cost, device-related services as the primary service on a claim. All other services reported on the same date will be considered “adjunctive, supportive, related or dependent services” provided to support the delivery of the primary service and will be unconditionally packaged into the OPPS C-APC payment of the primary service with minor exceptions.

‡ According to Medicare, devices do not need to remain in the body to be classified as “implants.”

NA “NA” indicates that there is no in-office differential for these codes.
