

2020 Quick Reference Guide – Neuromodulation

Ambulatory Surgical Center 2020

Coding and Payment Guide for Medicare Reimbursement: The following are the 2020 Medicare coding and national payment rates for Spinal Cord Stimulation (SCS) procedures performed in an ambulatory surgical center.

CPT® ¹	Description	Multiple Surgery Discounting ²	Status Indicator ³	National Average Payment ⁴
Lead & Pulse Generator Placement Codes				
63650	Percutaneous implantation of neurostimulator electrode array, epidural	N	J8	\$4,515
63655	Laminectomy for implantation of neurostimulator electrodes, plate/paddle, epidural	N	J8	\$15,942
63685	Insertion or replacement of spinal neurostimulator pulse generator or receiver, direct or inductive coupling	N	J8	\$23,466
Revision of Lead and Pulse Generators				
63663	Revision including replacement, when performed, of spinal neurostimulator electrode percutaneous array(s), including fluoroscopy, when performed	N	G2	\$4,413
63664	Revision including replacement, when performed, of spinal neurostimulator electrode plate/paddle(s) placed via laminotomy or laminectomy, including fluoroscopy, when performed	N	J8	\$14,522
63688	Revision or removal of implanted spinal neurostimulator pulse generator or receiver	N	A2	\$1,846
Removal of Leads and Pulse Generators				
63661	Removal of spinal neurostimulator electrode percutaneous array(s), including fluoroscopy, when performed	N	G2	\$797
63662	Removal of spinal neurostimulator electrode plate/paddle(s) placed via laminotomy or laminectomy, including fluoroscopy, when performed	N	G2	\$1,846
63688	Revision or removal of implanted spinal neurostimulator pulse generator or receiver	N	A2	\$1,846

Quantities used for each procedure must be specified for appropriate payment. Payment rates provided are Medicare national average payment rates for each specified procedure with quantity 1.

- CPT Copyright 2019 American Medical Association. All rights reserved. CPT® is a registered trademark of the American Medical Association. Applicable FARS/DFARS Restrictions Apply to Government Use. Fee schedules, relative value units, conversion factors and/or related components are not assigned by the AMA, are not part of CPT, and the AMA is not recommending their use. The AMA does not directly or indirectly practice medicine or dispense medical services. The AMA assumes no liability for data contained or not contained herein.
- In the case that multiple procedures are billed and coded, payment is typically made at 100% of the rate for the first procedure, and 50% of the rate for the second and all succeeding procedures. Such procedures subject to this discounting are marked "Y". However, procedure marked "N" are not subject to discounting, and are paid at 100% in full, regardless of whether they are submitted with other procedures.
- ASC Status indicators:
J8:Device-intensive procedure; paid at adjusted rate.
G2:Non office-based surgical procedure added in CY 2008 or later; payment based on OPPS relative payment weight. A2:Surgical procedure on ASC list in CY 2007; payment based on OPPS relative weight, subject to multiple reduction rule
- 2020 Medicare National Average payment rates, unadjusted for wage. "National Average Payment" is the amount Medicare determines to be the maximum allowance for any Medicare covered procedure. Actual payment will vary based on the maximum allowance less any applicable deductibles, co-insurance etc.

Medicare National Coverage Determination (NCD)⁵

In the case of spinal cord stimulation, Medicare has a longstanding National Coverage Determination (NCD) for electrical nerve stimulators (160.7) that includes specific criteria for coverage, which are as follows:

- The implantation of the stimulator is used only as a late resort (if not a last resort) for patients with chronic intractable pain;
- With respect to item a, other treatment modalities (pharmacological, surgical, physical, or psychological therapies) have been tried and did not prove satisfactory, or are judged to be unsuitable or contraindicated for the given patient;
- Patients have undergone careful screening, evaluation and diagnosis by a multidisciplinary team prior to implantation. (Such screening must include psychological, as well as physical evaluation);
- All the facilities, equipment, and professional and support personnel required for the proper diagnosis, treatment training, and follow up of the patient (including that required to satisfy item c) must be available; and
- Demonstration of pain relief with a temporarily implanted electrode precedes permanent implantation.

Medicare Local Coverage Determinations^{5,6,7}

Medicare has a long-standing NCD (160.7) for Electrical Nerve Stimulators (e.g., SCS). In addition to the NCD criteria, some Medicare contractors may require additional SCS coverage criteria through local coverage determinations (LCD). Please check with your local contractor. In the absence of an LCD, Medicare contractors will follow the NCD.

HCPCS Level II Descriptors

HCPCS Code	Descriptor
C1778	Lead, neurostimulator (implantable)
C1820	Generator, neurostimulator (implantable), with rechargeable battery and charging system
C1767	Generator, neurostimulator (implantable), nonrechargeable
C1787	Patient programmer, neurostimulator
C1883	Adapter/ extension, pacing lead or neurostimulator lead (implantable)
L8679*	Implantable neurostimulator pulse generator, any type
L8680	Implantable neurostimulator electrode, each
L8681	Patient programmer (external) for use with implantable programmable neurostimulator pulse generator, replacement only
L8687	Implantable neurostimulator pulse generator, dual array, rechargeable, includes extension
L8688	Implantable neurostimulator pulse generator, dual array, non-rechargeable, includes extension
L8689	External recharging system for battery (internal) for use with implantable neurostimulator, replacement only
L8699	Prosthetic implant, not otherwise specified
L9900	Orthotic and prosthetic supply, accessory, and/or service component of another HCPCS "L" code

* In 2014 a new HCPCS Level II code was established: L8679 - "Implantable neurostimulator pulse generator, any type". However, L8687 - "Implantable neurostimulator pulse generator, dual array, rechargeable, includes extension" may still be an active code on the fee schedule for some payers.

Disclaimer: Health economic and reimbursement information provided by Boston Scientific Corporation is gathered from third-party sources and is subject to change without notice as a result of complex and frequently changing laws, regulations, rules and policies. This information is presented for illustrative purposes only and does not constitute reimbursement or legal advice. Boston Scientific encourages providers to submit accurate and appropriate claims for services. It is always the provider's responsibility to determine medical necessity, the proper site for delivery of any services and to submit appropriate codes, charges, and modifiers for services that are rendered. Boston Scientific recommends that you consult with your payers, reimbursement specialists and/or legal counsel regarding coding, coverage and reimbursement matters. Boston Scientific does not promote the use of its products outside their FDA-approved label. Information included herein is current as of November 2019, but is subject to change without notice. Rates for services are effective January 1, 2020.

Sequestration Disclaimer: Rates referenced in these guides do not reflect Sequestration; automatic reductions in federal spending that will result in a 2% across-the-board reduction to ALL Medicare rates as of January 1, 2020. (Budget Control Act of 2011)
