

Boston Scientific Global Energy Management System Policy

I Commit to Protecting our Planet, People, Property and all things Boston Scientific

Boston Scientific believes that leading environmental performance contributes to our competitive strength and benefits our communities, customers, shareholders and employees. To reduce the impact of climate change, Boston Scientific has committed to achieving net zero carbon emissions associated with our manufacturing operations by 2030.

Through our Global Energy Management System (GEMS), Boston Scientific will:

- Embed our carbon neutrality commitment into the organization's Corporate Social Responsibility (CSR) strategy;
- Align with the United Nation's Framework Convention on Climate Change (UNFCCC) COP21 also known as the Paris Agreement on Climate Change;
- Agree the carbon neutrality boundary conditions to be Scope 1 and Scope 2 emissions, as defined by the Greenhouse Gas Protocol;
- Engage and commit top-management to the implementation of the vision;
- Commit to the development of an energy strategy with a roadmap to achieve energy objectives and targets;
- Establish continual energy performance improvement as a priority and align individual sites to it;
- Support the purchase of energy-efficient products and services, and design for energy performance improvement;
- Ensure continued compliance with all legal and other requirements;
- Provide the necessary information and resources to achieve energy performance improvement and carbon neutrality.

This policy will be reviewed annually and updated as necessary to ensure alignment with the CSR strategy. It shall be communicated within the organization and to relevant interested parties.
