

## **CISA: ACTIVE EXPLOITATION OF SOLARWINDS SOFTWARE**

Boston Scientific is dedicated to ensuring the safety and security of our products and has been closely monitoring the December 13, 2020 announcement regarding the active exploitation of SolarWinds Orion Platform software versions 2019.4 HF 5 through 2020.2.1 HF 1, released between March 2020 and June 2020. This vulnerability permits unwanted access to network traffic management systems.

We have completed an analysis of our devices, digital health apps and remote monitoring services and have determined that there is **no instance where the SolarWinds Orion software is in use.**
