

*Jagwire*TM

High Performance Guidewires

Boston
Scientific

**Agility and
Versatility**

The extended range of Jagwire high performance guidewires provides further options when performing ERCP.

Specific Tungsten-filled tip design for fluoroscopic visualisation and ductal access.

Endoglide™ Coating on distal shaft promotes smooth tracking.

Tungsten-filled tip enhances fluoroscopic visualisation.**

Hydrophilic distal 5cm facilitates selective cannulation and negotiation of difficult anatomy.

Kink-resistant shaft promotes control during advancement and support during instrument exchange.

Black and yellow pattern provides clear endoscopic visualisation – reducing the need for fluoroscopy during instrument exchange.

Non-slip proximal surface requires no special handling consideration and provides precise torque control.

RX compatible devices allow independent Jagwire control to improve selective duct cannulation.

Jagwire can be locked in place during ERCP for more secure access and simplified exchange.

Ordering Information

Order Number	O.D. (in) / (mm)	Shaft Design	Taper (in) / (mm)	Length (cm)	Tip Style
M0055656011	.025 / 0.64	Standard	.025-.020 / 0.64-0.51	450	Straight
M0055658011	.035 / 0.89	Standard	.035-.027 / 0.89-0.69	450	Straight
