**TORTUOUS ANATOMY**

Unique star-shaped inner catheter design* helps promote reliable needle actuation in tortuous anatomy (even after kinking).

**EFFICIENT ACCESS**

Pushable sheath construction designed to facilitate advancement through difficult pathways to remote anatomy.

**SMOOTH NEEDLE Penetration**

Beveled needle designed to facilitate injection.

**Injection Gold Probe™**

- **Order Number**: 6015, 6016
- **O.D. (F/mm)**: 7/2.33, 10/3.33
- **Minimum Working Channel (mm)**: 2.8, 3.7
- **Working Length (cm)**: 25
- **Connector Units**: Standard Box 1, 2, 10, 20

---

**Gold Probe™**

- **Order Number**: 6007, 6010, 6022
- **O.D. (F/mm)**: 7/2.33, 10/3.33
- **Minimum Working Channel (mm)**: 2.8, 3.7
- **Working Length (cm)**: 300
- **Connector Units**: Standard Box 1, 5, 10, 20

---

![Image of interject](image3)

**Interject™**

- **Order Number**: 2260, 2261
- **Sheath O.D. (mm)**: 1.8, 2.3
- **Scope O.D. (mm)**: 2.8
- **Number of Bands/Ligating Unit**: 1
- **Clip Opening (mm)**: 11
- **Working Length (cm)**: 155, 235
- **Units**: Box 1, 10, 20

---

![Image of speedband](image4)

**Speedband™**

- **Order Number**: 4225
- **Minimum Working Channel (mm)**: 2.8
- **Band/Looping Unit**: 8
- **Units**: Box 1, 2

---

**Resolution™ Clip**

- **Order Number**: V66021, 66022
- **Working Length (cm)**: 25
- **Minimum Working Channel (mm)**: 2.8, 3.7
- **Clip Opening (mm)**: 11
- **Units**: Box 1, 10, 20

**Interject™ Sclerotherapy Needles**

- **Order Number**: 1815, 1816, 1825, 1826, 1835, 1836
- **Gauge**: 18
- **O.D. (mm)**: 1.8, 2.3
- **I.D. (mm)**: 0.64, 0.51
- **Extension Length (mm)**: 23, 25
- **Working Length (cm)**: 200, 240
- **Units**: Box 5, 10, 20

---

**Interject™ Speedband™ Superview™ Super 7™**

- **Order Number**: 4225
- **Minimum Working Channel (mm)**: 2.8
- **Scope O.D. (mm)**: 2.8
- **Number of Bands/Ligating Unit**: 8
- **Units**: Box 1, 2

---

**Hemostasis Solutions**

Boston Scientific is committed to improving patient care in the management of gastrointestinal bleeding.

Through innovation and continuous educational support, we offer a wide range of therapeutic options including injection therapy, thermal therapy, mechanical therapy and ligaton.

---

For single use only. Do not reuse.
Resolution™ Clip

Hemostasis within the entire GI tract
Endoscopic marking
Closure of GI tract luminal perforations
Anchoring jejunal feeding tube

MR Conditional
per ASTM F2503

Resolution™ Clip is engineered to enable opening and closing up to 5 times prior to deployment, aiding in repositioning of the clip.

Reopening Capability

The radiopaque Resolution™ Clip is designed to provide excellent conductivity, uniform burn, and effective coagulation in various tip positions.

Precision spacing of electrode pairs helps control coagulation depth.

Proprietary Distal Tip Design

• Rounded Gold distal tip is designed to provide excellent conductivity, uniform burn, and effective coagulation in various tip positions.

• Precision spacing of electrode pairs helps control coagulation depth.

Ergonomic Handle with Pre-Loaded Wire and Scope Fastener

• Handle attachment engineered to offer operator comfort.

• Audible, tactile and visual stop to confirm band deployment.

Clear Ligating Unit with Rear-Mounted Bands

• Provides excellent visibility for rapid navigation and pathology identification.

• Single string deployment allows excellent suction for tissue capture, band placement and band retention.

• Alert Band offers a visual clue that only one band remains.

Square Moulded Bands

• Ensure consistent shape and reliable performance.

• Latex-free material designed to reduce the risk of allergic reactions.

Firm Catheter Shaft for Tamponade

• Designed to reduce kinking, facilitating advancement and helping to provide better in-line and tangential tamponade.

• Hemoglide coating helps reduce surface friction to facilitate passage through the endoscope.

Unique Integrated Injection and Thermal Hemostasis Capabilities

• Designed to help reduce catheter exchanges and procedural time.

• Engineered for smooth, consistent needle extension, even in difficult endoscope positions.

• Integrated irrigation channel with port located distal to generator connectors facilitating manual or mechanical irrigation for visibility.

Proven Retention Performance

• Significantly higher retention on than competitor clips.

• Deeper penetration into the tissue portion of the lesion.

11mm-Wide Jaw Span

Intended to grasp a sizeable amount of tissue.

User-Friendly Handle

Designed to deliver a familiar actuation for opening and closing the jaws. Provides tactile and audible (1st click, 2nd click) feedback upon closing of jaws, indicating that the clip is being deployed.
