Refer to the device directions for use for complete instructions on device use.

**Caution**

Federal Law (USA) restricts this device to sale by or on the order of a physician.

**Warning**

Contents supplied STERILE using a Radiation process. Do not use if sterile barrier is damaged. If damage is found, call your Boston Scientific representative.

For single use only. Do not reuse, reprocess or resterilize. Reuse, reprocessing or resterilization may compromise the structural integrity of the device and/or lead to device failure which, in turn, may result in patient injury, illness or death. Reuse, reprocessing or resterilization may also create a risk of contamination of the device and/or cause patient infection or cross-infection, including, but not limited to, the transmission of infectious disease(s) from one patient to another. Contamination of the device may lead to injury, illness or death of the patient.

After use, dispose of product and packaging in accordance with hospital, administrative and/or local government policy.

Endoscopy should be performed only by persons having adequate experience and training. Read these instructions thoroughly, failure to follow instructions may lead to serious medical consequences.

**Device Description**

The Multibite Multiple Sample Biopsy Forceps are designed to collect tissue endoscopically for histological examination. A total of four biopsy samples may be taken without removing the forceps from the scope. The Multibite Biopsy Forceps are available in both 160 cm and 240 cm working lengths and require a scope with a minimum working channel of 2.8 mm.

**Intended Use/Indications for Use**

The Multibite Multiple Sample Biopsy Forceps are designed specifically to collect tissue endoscopically for histologic examinations. These instruments are intended for endoscopic gastrointestinal biopsy and should not be used for any purpose other than their intended function.

**Contraindications**

When gastrointestinal endoscopy or biopsy is otherwise contraindicated.

**Precautions**

Caution: Application of excessive force to the instrument may damage it. The forceps should be held with the index finger and middle finger comfortably resting on the spool ledge and the thumb in the loop. When other methods of operation are used, such as pushing on the thumb loop with the palm of one’s hand, the resulting force may be so excessive as to cause jaw damage.

**Adverse Effects**

None known.
