

Agile™

Esophageal Fully & Partially Covered Stent System

Featuring a Through-the-Scope
Delivery System

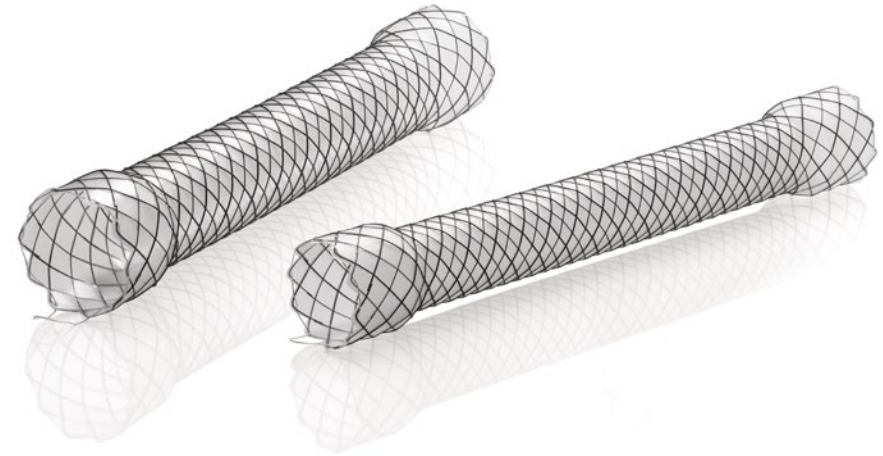

About Agile™

The Agile Esophageal Stent System offers a flexible and conformable self-expanding metal stent on a through the scope delivery system which enables direct visualisation during deployment and may help minimise reliance on fluoroscopy. The Agile portfolio is offered in fully covered and partially covered designs.

- Offering new sizing options including a 60mm length and 14mm diameter designed to meet a variety of clinical needs, all size configurations are offered in partially covered, fully covered and fully covered removable options.
- Braided dual gauge nitinol wire provides an implant that is more flexible and conformable.*
- Atraumatic looped ends to help minimise risk of trauma.
- Retrieval suture on both ends of stent.
- Tissue In-Growth Prevention – the silicone covering extends the entire length of the Fully Covered Agile Esophageal Stent and is designed to address tumour ingrowth.

*Compared to WallFlex™ Esophageal 18mm stent diameter. WallFlex Esophageal is not available in a 14mm stent diameter for direct comparison.

Delivery System

Through-the-Scope design

- Provides direct visualisation to aid physicians in stent placement and help minimise fluoroscopic dependence.
- Designed to offer flexibility and trackability to enhance physician control.

Low profile delivery system

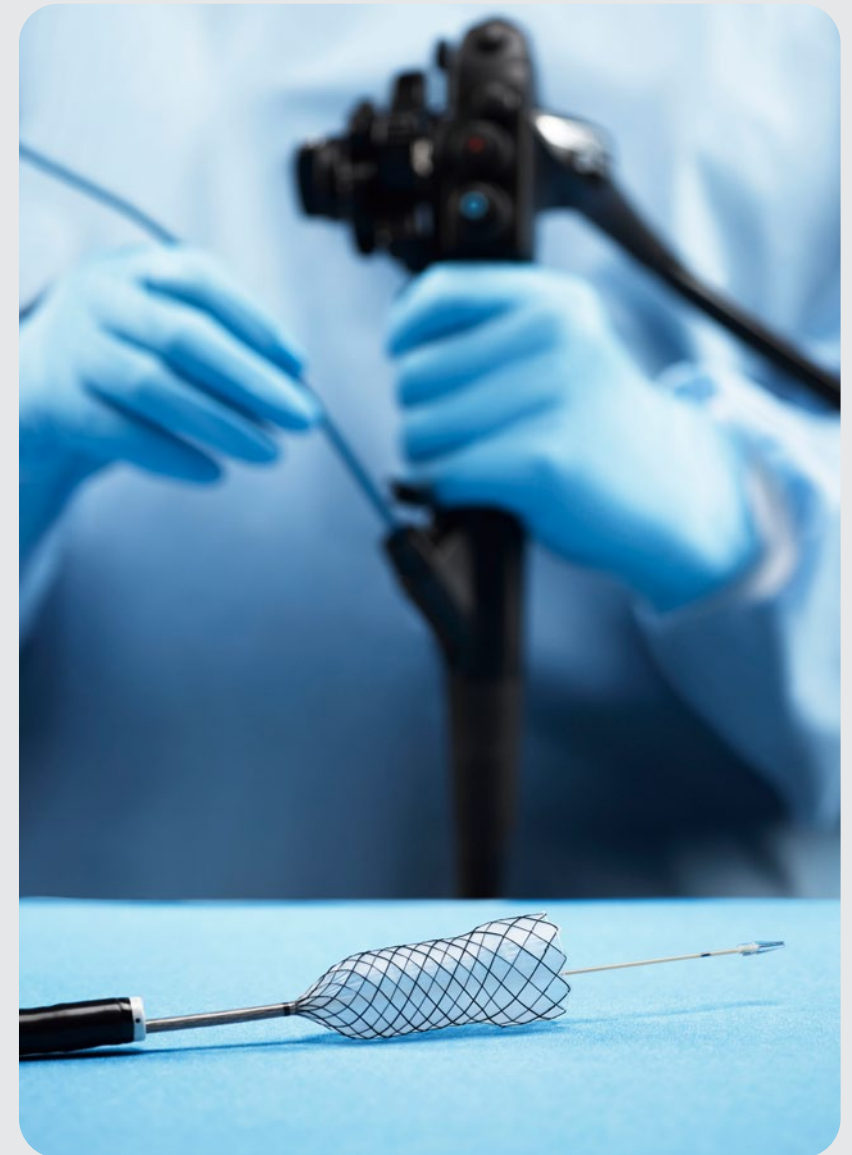

Compatible with a 3.7mm working channel, designed to navigate through tight strictures.

5 radiopaque markers

Markers signal the ends of the stent, the midpoint of the stent, and the point at which the stent can no longer be recaptured, aiding in deployment. The fifth marker at the leading end of the exterior tube indicates how far the stent has been deployed.

Reconstrainability

In the event that the stent is not exactly where a physician intends it to be, the stent can be reconstrained up to 2x and redeployed.

Ordering Information

The Agile™ Esophageal Partially Covered Stent System is intended for maintaining esophageal luminal patency in esophageal strictures caused by intrinsic and/or extrinsic malignant tumours and occlusion of concurrent esophageal fistulas.

Agile Esophageal Stent System—Partially Covered					
Order Number	GTIN	Stent O.D. (mm)	Proximal/Distal Flares O.D. (mm)	Stent Length (mm)	Delivery System Diameter (Fr)
