

A NEW ERA IN EVERY LAB

The AVVIGO Guidance System II offers the game-changing performance of the COMET™ II Pressure Guidewire along with high-definition IVUS using the OPTICROSS™ HD Imaging Catheter, all in a flexible platform.

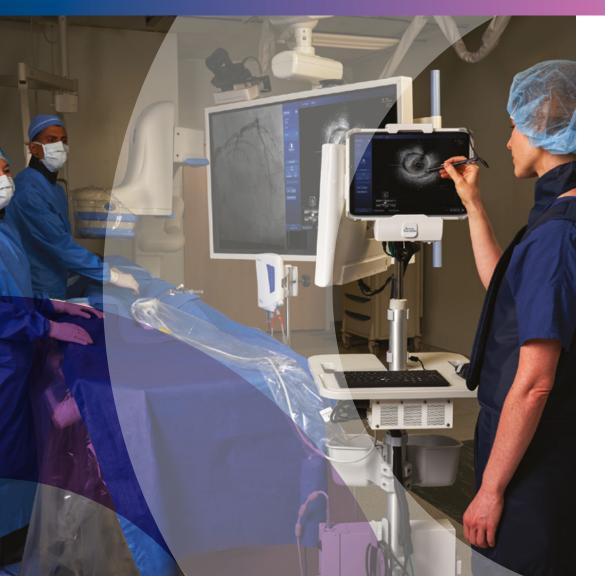

CAUTION: The law restricts these devices to sale by or on the order of a physician. Indications, contraindications, warnings, and instructions for use can be found in the product labelling supplied with each device or at www.IFU-BSCI.com. Products shown for INFORMATION purposes only and may not be approved or for sale in certain countries. This material not intended for use in France.

AVVIGO Guidance System II Mobile Platform with Tablet A streamlined multi-modality guidance system platform.

High-Performance Product Portfolio

A full suite of high-definition IVUS imaging catheters and a true workhorse pressure guidewire offer best-in-class deliverability.

Intuitive Software

User friendly software features an easy workflow and specialized tools for IVUS and coronary physiology.

Flexible Integration

Fully integrated and mobile options available to fit seamlessly in any lab.

COMET™ II Pressure Guidewire Total Confidence in Your Treatment Decision.

Deliverability

- Shapeable and atraumatic Asahi tip
- Precision cut body for 1:1 torque

Accuracy

 Optical technology for exceptional drift performance and reliable signal connection

Usability

- Optimized rail support for device delivery
- Free-spinning, quick-release handle
- One wire for the entire procedure

OPTICROSS™ HD 60 MHz Coronary Imaging Catheter Visualize better outcomes with IVUS.

 Precise image with 6 mm depth for small to large vessel assessment

Exceptional Deliverability

• Well-balanced engineering design

5F And 6F Compatible

Assist in more cases

Advanced Software | Features

DFR

Care Care Control of the control of

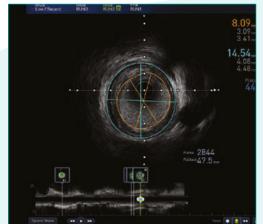

DFR calculates a diastolic portion of the cardiac cycle at rest. DFR uses a cutoff of 0.89 and is numerically equivalent to iFR. The DFR window uses two criteria: Pd < mean Pa and down-sloping Pa. No ECG signal is required.

smFFR

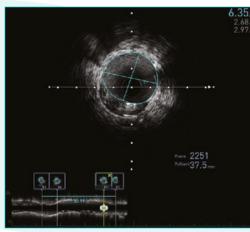

smFFR automatically excludes certain artifacts (e.g., flushing, opening AO stopcock or hemostasis valve, pulling out guidewire during recording) to latch to the true FFR value.

Trace Assist™

An aid to automatically draw lumen and vessel borders.

LongView™

IVUS LongView provides a user the ability to guide PCI with length measurements and visualization of bifurcations.

Ordering Information

The AVVIGO Guidance System II provides digital IVUS imaging for coronary, peripheral and intracardiac applications. FFR and DFR modalities are indicated to provide blood pressure gradient across coronary lesions of patient that undergo endovascular diagnostic and treatment procedures.
