S-ICD Implant Technique Training Offering

## S-ICD Implant Technique Training Offering — New Implanters

HCP Profile (New Implanter): ≤ 5 implants in 2 years

<sup>1</sup> Online completion highly recommended. **Mandatory exposure to best practices** through field force.

<sup>2</sup> **One didactic session is mandatory.**

- Case observation can be an (e)CoE or an interview with proctor to be exposed to Best Practices through a recorded case
- Dummy is a simulator with built-in bones, fascia, muscles and removable skin, designed to demonstrate the S-ICD implant procedure. It's highly recommended prior to first procedures, to familiarize with all implant steps.

<sup>3</sup> **Minimum 5 (e)Proctorship** in total are expected to acquire implanting skills (with minimum 2 cases per proctoring day), reviewed case by case. First 2 proctoring sessions must be F2F if no prior hands-on experience implanting S-ICD.
