

Mastering S-ICD Best Practices

S-ICD Workflow From Screening to Follow-up

Training Description

The training programme S-ICD - From Screening to Follow-up is designed to **provide allied professionals with knowledge on the S-ICD System**, from the screening process (including the use of the Automated Screening Tool) to **device implant** and **follow-up**.

Learning Objectives

Upon completion of this training, participants will be able to:

- Understand the **S-ICD workflow** from Screening to Follow-Up
- Recognize the **pivotal role of screening** in the S-ICD workflow and its impact on patient selection and procedure success.
- Demonstrate advanced **skills in conducting thorough S-ICD screenings**, encompassing the assessment of patient suitability and the effective addressing of potential challenges.
- Identify strategies to enhance the efficiency of the S-ICD workflow, minimizing delays and ensuring patient safety.
- Equip the allied professionals with the knowledge and skills required to conduct effective follow-up and management of patients with S-ICD devices.
