

# New Cholangioscope Portfolio

## New! Expanded cholangioscopy portfolio offered by Boston Scientific

SpyGlass™ DS II Direct Visualization System and Scivita Medical Single-use Video Cholangioscope, exclusively distributed by Boston Scientific.

### SpyGlass Direct Visualization System

With 10+ years of clinical evidence and procedural success, SpyGlass™ DS Direct Visualization System has been shipped to more than 85 countries, potentially impacting over 250,000 procedures since 2015.\*

### Scivita Medical Single-use Video Cholangioscope

Boston Scientific's collaboration with Scivita Medical aims to accelerate the development and delivery of innovative cholangioscopy and imaging solutions. Boston Scientific's exclusive distribution of the Scivita Medical cholangioscope portfolio will broaden portfolio options for gastroenterologists.

### SpyGlass™ DS II Direct Visualization System

SpyGlass™ DS II

Scivita Medical Single-use Video Cholangioscopes

### The complete system of high-resolution imaging and accessory devices designed for pancreaticobiliary stone and stricture management.

The SpyGlass DS II Direct Visualization System with Sight Shield Technology enables high resolution imaging of the bile and pancreatic ducts during ERCP. Complementary SpyGlass tools enable targeted biopsies, stone fragmentation, and foreign body removal.

### New features available through Scivita Medical Single-use Video Cholangioscope and Endoscopic Image Processing Device bring additional options to cholangioscopy procedures.

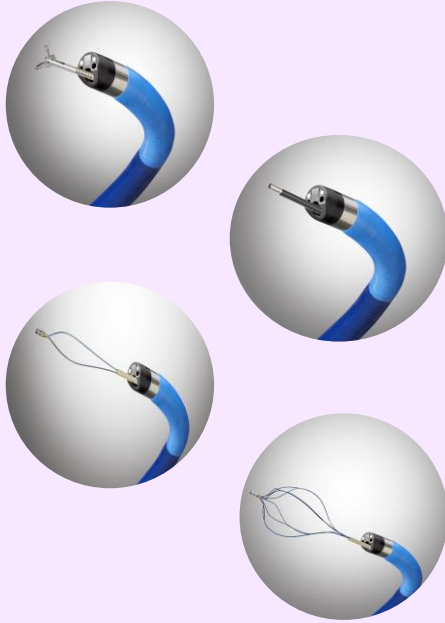

Benefit from increased versatility with expanded size options: available with 2.0mm or 1.2mm working channel options, with respective outer diameters of 11Fr and 8.9Fr. Features include:

- Image adjustment with the ability to freeze dynamic video images and electronic zoom on image,
- The ability to connect a USB flash drive to store photos and videos
- Take photos of endoscopic images and record videos.
