

Resolution 360™ Clip

Hemoclip

THE RESOLUTION CLIP PORTFOLIO

Resolution Clip is intended to be used for¹

- Hemostasis within the entire GI tract
 - > Prophylactic clipping
- Endoscopic marking
- Closure of GI tract luminal perforations
- Anchoring jejunal feeding tubes

FEATURES AND BENEFITS

Secure locking mechanism, designed to lock securely in place for improved retention³

MR Conditional according to ASTM F2503

Tactile feedback, allows the user to confirm hemostasis before deploying the clips

User friendly handle. Designed to provide tactile and audible (1st click, 2nd click) feedback upon closing of jaws, indicated that the clip is being deployed

RESOLUTION 360 CLIP builds on the strong clinical and economic track record established by Resolution™ Clip and offers new benefits to providers and patients including controlled clip placement and shorter procedure times

NEW ERGONOMIC HANDLE

Designed with same tactile and deployment feedback as Resolution™ Clip

ROTATION CONTROL KNOB

Allows for 1 to 1, nurse/technician controlled rotation

BRAIDED CATHETER

Allows for 1 to 1, physician controlled rotation at the biopsy cap on the scope

NO SHEATH

The function of the outer sheath requires additional steps to expose the Resolution clip jaws. The elimination of the outer sheath in the Resolution 360 Clip design, therefore, allows for fewer setup steps

Hemostasis Solutions

Boston Scientific

Boston Scientific is committed to improving patient care in the management of gastrointestinal bleeding.

Through innovation and continuous educational support, we offer a wide range of therapeutic options including injection therapy, thermal therapy, mechanical therapy and ligation.

Resolution™ Clip

Hemoclip

The Resolution Clip has impacted more than 2.5 million patient lives

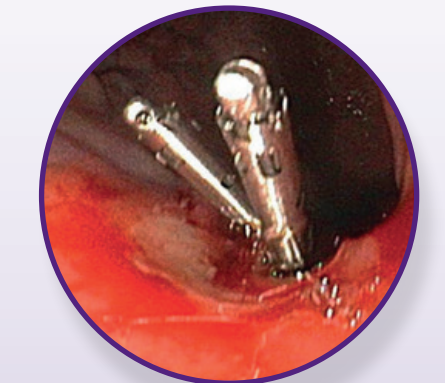

June 29, 2004:
First Resolution
Clip placed

2009:
More than 1,000,000
Resolution Clips placed

February 2013:
MR Conditional Claim
Commercially Launched

January 2016:
More than 7 million
Resolution Clips placed

February 2016
Prophylactic Clipping
Indication
Commercially Launched

Two Resolution Clips placed on Chronic Gastric Ulcer base⁴

11MM-WIDE JAW SPAN

Intended to span tissue

Stopper

Interject Injection Therapy Needle Catheter™

Sclerotherapy Needles

TORTUOUS ANATOMY

Unique star-shaped inner catheter design* helps promote reliable needle actuation in tortuous anatomy (even after kinking)

Unique star-shaped technology*

EFFICIENT ACCESS

Pushable sheath construction designed to facilitate advancement through difficult pathways to remote anatomy

SMOOTH NEEDLE PENETRATION

Beveled needle designed to facilitate injection

Smooth beveled needle designed to facilitate injection

Convenient locking hub for procedural efficiency

*Patent on file Boston Scientific Corp.

Injection Gold Probe™ & Gold Probe™

Bipolar Electrohemostasis Catheters

PROPRIETARY DISTAL TIP DESIGN

- Rounded Gold distal tip is designed to provide excellent conductivity, uniform burn, and effective coagulation in various tip positions
- Precision spacing of electrode pairs helps control coagulation depth

A 10F (3.3 mm) Injection Gold Probe Catheter is used to inject a vasoconstrictor around the vessel.

FIRM CATHETER SHAFT FOR TAMPONADE

- Designed to reduce kinking, facilitating advancement and helping to provide better *en face* and tangential tamponade
- Hemoglide coating helps reduce surface friction to facilitate passage through the endoscope

UNIQUE INTEGRATED INJECTION AND THERMAL HEMOSTASIS CAPABILITIES

- Designed to help reduce catheter exchanges and procedural time
- Engineered for smooth, consistent needle extension, even in difficult endoscope positions
- Integrated irrigation facilitating manual or mechanical irrigation for visibility

INJECTION GOLD PROBE HANDLE

Speedband™ Superview™ Super 7™

Multiple Band Ligator

ERGONOMIC HANDLE WITH PRE-LOADED WIRE AND SCOPE FASTENER

- Handle attachment engineered to offer operator comfort
- Audible click, tactile and visual stop to confirm band deployment

CLEAR LIGATING UNIT WITH REAR-MOUNTED BANDS

- Provides visibility for rapid navigation and pathology identification
- Single string deployment allows suction for tissue capture, band placement and band retention
- Alert Band offers a visual clue that only one band remains

SQUARE MOULDED BANDS

- Ensure consistent shape and reliable performance
- Latex-free material designed to reduce the risk of allergic reactions

Visibility and Suction

Single and Multiple Variceal Band Ligation
