

# Rezūm™ EVO

## Water Vapour Therapy Console

### Proven results for patients. Streamlined design for care teams.

The Rezūm EVO Console is designed to enhance the user experience for urologists and their staff, while continuing to support long-term LUTS relief and high patient satisfaction with Rezūm Water Vapour Therapy.<sup>1-3</sup>

The Rezūm EVO Console features a smaller footprint with improved mobility compared to the first-generation Rezūm Generator, **designed for greater ease of use in a range of care settings**. With its **durable design** and intuitive user interface, the Rezūm EVO Console is **intended to help procedural staff of all experience levels work efficiently and independently**.<sup>1</sup>

**Operational efficiency**

**Care setting flexibility**

**Console longevity**

**Boston  
Scientific**  
Advancing science for life™

## Improved operational efficiency

The Rezūm EVO Console features a 3D-animated, touch-guided user interface with an intuitive design, intended to **accelerate the operational learning curve and improve ease of use for staff by helping to facilitate console setup and disassembly.**

Audible cues and visual instructions are designed to **minimise disruptions for staff and urologists**, providing information on:

- Replacing the irrigation bag
- Refilling the sterile water syringe
- Draining the patient's bladder

15-inch (38 cm) touch screen prominently displays procedure information for **ease of viewing** by urologists and staff.

## Care setting flexibility

Treat in a variety of settings – including those limited by space. Compared to the first-generation Rezūm Generator, **the Rezūm EVO Console provides enhanced mobility and a smaller footprint.**

- The mobility pole is engineered to provide **enhanced console manoeuvrability**, with a pole handle and low rolling resistance wheels.
- **Integrated irrigation hook** on the mobility pole eliminates the need for an external IV pole, reducing the capital footprint to provide ease of use in a space-constrained care setting.
- The mobility pole is **height-adjustable** from 142 to 170 cm, optimising console viewing height during setup and treatment.

## Console longevity

Invest with confidence. The Rezūm EVO Console features an innovative architecture **designed for reliable, lasting performance.**

## Boston Scientific's ExpertCare Equipment Support and Services are designed to put your mind at ease so you can focus on patient care, not equipment.

- **Our ExpertCare team** is dedicated to maximising your investment and delivering peace of mind with tailored coverage options that provide transparency and budget certainty without hidden charges for your Rezūm™ EVO Water Vapour Therapy Console.
- **ExpertCare service plans** can help preserve your equipment uptime with access to hassle-free priority care and predictable cost of ownership.
- **Our knowledgeable team** of technical experts genuinely care and will aim to provide prompt resolution to enable the highest quality performance out of your system.
