

UNDERSTANDING THE IMPACT OF COVID-19 ON OUR PATIENTS

Patients are nervous but want to complete planned procedures; seeking reassurance and clear direction from HCPs and facilities.

27 Parkinson's disease patients who had a scheduled Deep Brain Stimulation procedure delayed or canceled due to COVID-19 were surveyed in May 2020 to better understand emotional impact, conditions for revisiting HCPs, expected timing and valued information sources.

PATIENT SENTIMENT

77%

are nervous or very nervous about visiting their HCP

86%

are nervous or very nervous about visiting a hospital or surgery center

30%

agreed/strongly agreed that they would have the procedure done soon if the hospital and doctor would allow
