FATHOM-14 STEERABLE GUIDEWIRE

CAUTION:
Federal law (USA) restricts this device to sale by or on the order of a physician. Rx only. Prior to use, please see the complete "Directions for Use" for more information on Indications, Contraindications, Warnings, Precautions, Adverse Events, and Operator’s Instructions.

INTENDED USE/INDICATIONS FOR USE:
The FATHOM-14 Steerable Guidewire is intended for general intravascular use in the peripheral vasculature. It can be used to selectively introduce and position catheters and other interventional devices within the peripheral vasculature. This device should be used only by physicians trained in percutaneous, intravascular techniques and procedures.

CONTRAINDICATIONS:
None known.

WARNINGS:
The FATHOM Steerable Guidewire is not intended for use in the coronary vasculature or the neurovasculature.

ADVERSE EVENTS:
Complications attributed to endovascular procedures are the following: • Vessel trauma • Vessel damage • Embolism (catheter/device, air bubble, plaque, thrombus, air embolism, thromboembolism) • Pseudoaneurysm • Seizure/stroke • Vessel dissection • Hematoma at the puncture site • Nerve injury • Infection • Perforation of the vessel • Vessel spasm • Hemorrhage • Vascular thrombosis • Vessel occlusion • Death • Bleeding • Failed treatment • Inability to position guidewire • Damage to the catheter.

FATHOM-16 STEERABLE GUIDEWIRE

CAUTION:
Federal law (USA) restricts this device to sale by or on the order of a physician. Rx only. Prior to use, please see the complete "Directions for Use" for more information on Indications, Contraindications, Warnings, Precautions, Adverse Events, and Operator’s Instructions.

INTENDED USE/INDICATIONS FOR USE:
The FATHOM-16 Steerable Guidewire is intended for general intravascular use in the peripheral vasculature. Transforming Guidewire Flexibility and Trackability

Microfabrication technology is designed to give you the flexibility and trackability to access tortuous anatomy.

**Clinical Flexibility**
- Fathom-16 is now available in both 200 and 215 cm lengths
- Pre-shaped tip designed to help access the most difficult anatomy

**Distal Tip Design**
- Inner stainless steel core wire for shapeability
- Platinum/tungsten alloy coil tip provides exceptional radiopacity
- Clear polymer tip designed for atraumatic entry into delicate vasculature

**Hydrophilic Coating**
- Lubricious hydrophilic coating on distal segment
- PTFE coating on proximal segment

**Microfabrication Technology**
- Diamond-cut Nitinol hypotube maximizes torque transmission
- Alternating pattern of microscopic channels designed to provide outstanding flexibility

**Torque Transmission**
- Through Microfabricated Distal Segment
- Through Core Wire

The Fathom™ Steerable Guidewires combine a Nitinol hypotube distal segment with advanced microfabrication technology, creating a design that revolutionizes access of the most tortuous peripheral vasculature.
**INTENDED USE/INDICATIONS FOR USE:**
The FATHOM -14 Steerable Guidewire is intended for general intravascular use in the peripheral vasculature. It can be used to selectively introduce and position catheters and other interventional devices within the peripheral vasculature. This device should be used only by physicians trained in percutaneous, intravascular techniques and procedures.

**CONTRAINDICATIONS:**
None known.

**WARNINGS:**
The FATHOM Steerable Guidewire is not intended for use in the coronary vasculature or the neuro vasculature.

**ADVERSE EVENTS:**
Complications attributed to endovascular procedures are the following:
- Vessel trauma
- Vessel damage
- Embolism (catheter/device, air bubble, plaque, thrombus, air embolism, thromboembolism)
- Pseudoaneurysm
- Seizure/stroke
- Vessel dissection
- Hematoma at the puncture site
- Nerve injury
- Infection
- Perforation of the vessel
- Vessel spasm
- Hemorrhage
- Vascular thrombosis
- Vessel occlusion
- Death
- Bleeding
- Failed treatment
- Inability to position guidewire
- Damage to the catheter.
