AdVance™ XP
Male Sling System

The next-generation solution for male stress urinary incontinence.

Help your patients find happiness.
Worldwide male sling market leader.¹

Choose the AdVance XP Male Sling System for predictable procedural performance, enhanced ease of use and improved clinical outcomes.² ³

Urologist benefits

- Efficient procedure
  - Directional chevron anchors for enhanced tissue fixation
  - Integrated permanent tensioning sutures for consistent support
  - Modified angle enhances trocar passage
  - Additional 8 cm of sling arm length to accommodate larger anatomies
  - Twice the shelf life of first-generation sling¹

- Established outcomes
  - More than 9 years of clinical use¹
  - More than 20,000 patients treated¹
  - Demonstrated long-term success rates ranging from 76-89.4% at 3 years in patients with mild to moderate incontinence² ³
  - In patients with a higher BMI, AdVance XP Sling has cure rates of 90.5% vs. 45% with AdVance⁴

Patient benefits

- Minimally invasive procedure designed to allow most patients to resume normal, daily activities faster than with the previous generation device⁵
- Patients may be continent immediately following their procedure⁶
- Patient manual dexterity and mental acuity are not criteria for exclusion⁶
- Can be used in combination with any penile prosthesis⁷
- If needed, the transition to an AMS 800™ Urinary Control System does not usually require mesh excision⁸
Mechanism of action

The sling is placed flat along the corpus spongiosum.

The AdVance XP Male Sling is then tensioned, thereby repositioning the bulbous urethra and resulting in an increased functional urethral length and a backdrop of support to the distal membranous (sphincteric) urethra during stress events.

Patient risks

- Possible side effects could include pain, inflammation, urethral or tissue damage, bleeding and irritation at the wound site and urinary retention, which typically resolves within a few days.5,9
- Contraindications include patients with urinary tract infections, blood coagulation disorders, compromised immune systems, renal insufficiencies or upper tract obstructions or upper urinary tract obstructions.5
- Patients should abstain from heavy lifting, strenuous exercise and intercourse for a minimum of six weeks.5

AdVance XP Sling ordering information

| Product number | 720163-01 |

Caution: U.S. Federal law restricts this device to sale by or on the order of a physician.

CAUTION: The law restricts these devices to sale by or on the order of a physician. Indications, contraindications, warnings and instructions for use can be found in the product labelling supplied with each device. Information for use only in countries with applicable health authority registrations. This material not intended for use in France.

Prior to using these devices, please review the Directions for Use for a complete listing of indications, contraindications, warnings, precautions and potential adverse events.

The AdVance™ XP Male Sling System is intended for the placement of a suburethral sling for the treatment of male stress urinary incontinence (SUI). These devices are contraindicated for patients with urinary tract infections, blood coagulation disorders, a compromised immune system or any other condition that would compromise healing, with renal insufficiency, and upper urinary tract relative obstruction. Possible adverse events include, but are not limited to, urinary retention, return to incontinence, pain, erosion, infection, device migration, bleeding, and pelvic organ dysfunction. MH-557013-AA
