Ureteral Stent Tracker

No Stent Left Behind

An easy way to track stent placements to reduce the risk of forgotten stents.
What happens when ureteral stents are forgotten?

13 OUT OF 100 ureteral stents will be forgotten.¹

10 OF THESE 13 will become encrusted, resulting in increased risk of infection, obstruction and retention.²,³

Requiring an average of 2 SURGICAL PROCEDURES for stent removal.²

When a digital tracking tool is used, forgotten stents are DRAMATICALLY REDUCED TO

1 IN 100

Fewer than 1 in 100 of these stents become encrusted.¹,²

No stent left behind.

The Ureteral Stent Tracker is a new digital solution to record and monitor ureteral stent placements and extractions.

The HIPAA-compliant Ureteral Stent Tracker allows users to easily track stent placements, resulting in reduced complications due to forgotten stents, reduced risk of litigation for retained stents and improved tracking efficiency and accuracy.

Reduce complications for patients

- Forgotten, encrusted stents result in increased risk of infection, obstruction, and retention and require an average of 2 additional surgical procedures²,³
- Using a digital tracking tool dramatically reduces forgotten stents from 13 out of 100 to 1 in 100¹

Reduce litigation risk for retained stents

- 16% of the New York Endourology lawsuits were for retained stents⁴
- 5% of UK Urology lawsuits that found for the plaintiff were for retained stents⁵

Improve tracking efficiency and accuracy

- Create a stent case record with extraction due date in seconds
- Scan a Boston Scientific stent bar code to automatically populate stent details
Create a stent case record with extraction due date in seconds

Scan a Boston Scientific stent bar code to automatically populate stent details

Easy tracking for every stent you place.

- Multiple users may follow and update stent case record
- Receive recurring email notifications regarding stent status
- HIPAA-compliant to safely store patient information
- Available in a web portal or mobile device
