C-code cross-reference to Boston Scientific products

For all C-code cross-references, please reference the Boston Scientific Product C-code Finder at: www.bostonscientific.com/en-US/reimbursement/ccode-finder.html

On claims for Medicare beneficiaries, hospitals and Ambulatory Surgery Centers (ASCs) should report not only the appropriate procedure code, but also all applicable device C-codes.

C-codes are tracking codes established by the Centers for Medicare & Medicaid Services (CMS) to assist Medicare in establishing future ambulatory payment classification (APC) payment rates. C-codes only apply to Medicare hospital outpatient and ASC claims. They do not typically trigger additional payment to the facility today, with the exception of designated Transitional Pass-through (TPT) devices, but reporting will help to inform future outpatient hospital and ASC payment rates.^{1,2}

See page 103 for more information.

Important – please note:

Health economic and reimbursement information provided by Boston Scientific Corporation is gathered from third-party sources and is subject to change without notice as a result of complex and frequently changing laws, regulations, rules, and policies. This information is presented for illustrative purposes only and does not constitute reimbursement or legal advice. Boston Scientific encourages providers to submit accurate and appropriate claims for services. It is always the provider's responsibility to determine medical necessity, the proper site for delivery of any services, and to submit appropriate codes, charges, and modifiers for services rendered. It is also always the provider's responsibility to understand and comply with Medicare national coverage determinations (NCD), Medicare local coverage determinations (LCD), and any other coverage requirements established by relevant payers which can be updated frequently. Boston Scientific recommends that you consult with your payers, reimbursement specialists, and/or legal counsel regarding coding, coverage, and reimbursement matters. Boston Scientific does not promote the use of its products outside their FDA approved label. Information included herein is current as of January 2025 but is subject to change without notice.

Ordering numbers

Boston Scientific Corporation uses a fully computerized order entry system for the convenience of our customers. The system enables customer service representatives to provide you with instant order entry as well as up-to-date order status information.

The system uses UPN order numbers for each product. The bold numbers are the old order numbers (see example). Please use either of these numbers when placing an order.

Boston Scientific customer service representatives will be happy to help you with any questions. We are eager to make the ordering procedure as simple and efficient as possible.

Sensor™ Dual-Flex PTFE-Nitinol		
Order number	Diameter (in)	Length (cm)
M0066703081	.035	150
M0066703011	.035	150
M0066703121	.038	150
M0066703021	.038	150

Bold type is an example of old order number

Explore. Order. Track.

Ordering products and having them available when needed is an essential part of patient care. With Boston Scientific's eCommerce platform, you can access our comprehensive online catalog, track order status, see contracted pricing, and more. * Caution: For Female Mid-Urethral Slings: U.S. Federal law restricts this device to sale by or on the order of a physician trained in use of surgical mesh for repair of stress urinary incontinence.

Refer to package insert provided with these products for complete Indications for Use, Contraindications, Warnings, Precautions, Adverse Events, and Instructions prior to using these products.

The following adverse events have been reported due to suburethral sling placement, any of which may be ongoing, but are not limited to: As with all implants, local irritation at the wound site and/or a foreign body response may occur, Foreign body reaction may be acute or chronic, Pain (pelvic, vaginal, groin/thigh, suprapubic, dyspareunia) (acute or chronic), Dyspareunia, Tissue responses to the mesh implant could include: erosion into organs (urethra, bladder or other surrounding tissues); exposure/extrusion into the vagina, Mesh contact with urine via erosion/exposure/extrusion may result in stone formation, scarring/scar contracture, Necrosis, fistula formation (acute or chronic), inflammation (acute or chronic), Mesh contracture, Tissue contracture, Vaginal shortening or stenosis that may result in dyspareunia and/or sexual dysfunction, Pain with intercourse that may not resolve, Exposed mesh may cause pain or discomfort to the patient's partner during intercourse, Sexual dysfunction, including the inability to have intercourse. Like all foreign bodies, the mesh may potentiate an existing infection. Allergic reaction has been reported. Known risks of surgical procedures for the treatment of incontinence include: pain, ongoing pain (pelvic, vaginal, groin/thigh, suprapubic, dyspareunia), Severe, chronic pain, Apathy, Leg weakness, Infection, De novo detrusor instability, Complete failure of the procedure/failure to resolve a patient's stress urinary incontinence, Voiding dysfunction (incontinence, temporary or permanent lower urinary tract obstruction, difficulty urinating, pain with urination, overactive bladder, and retention), Bruising, bleeding (vaginal, hematoma formation), Abscess, Vaginal discharge, Dehiscence of vaginal incision, Edema and erythema at the wound site, Perforation or laceration of vessels, nerves, bladder, urethra or bowel may occur during placement. The following additional adverse events have been reported for the Solyx SIS System: Dysuria, Hematuria. The occurrence of these events may require surgical intervention and possible removal of the entire mesh. In some instances, these events may persist as a permanent condition after surgical intervention or other treatment. Removal of mesh or correction of mesh-related complications may involve multiple surgeries. Complete removal of mesh may not be possible and additional surgeries may not always fully correct the complications.

C-code cross-reference to Boston Scientific products

For all C-code cross-references, please reference the Boston Scientific Product C-code Finder at:

www.bostonscientific.com/en-US/reimbursement/ccode-finder.html

Background

C-codes are required by Medicare on claims where procedures are billed under the Outpatient Prospective Payment System (OPPS). They are used to track the types of devices used during applicable outpatient procedures and to ensure that both procedures and devices are appropriately billed. Claims can be returned if the primary device required for the procedure is not included on the same claim. Separate device reimbursement is typically not driven by C-code use. It is important to charge appropriately for device-related procedures because hospital's charging practices will determine adequacy of future Medicare hospital outpatient rates. Medicare sets new hospital outpatient rates using hospital claims and cost data from prior years.^{1,2}

When hospitals fail to include appropriate device charges on the claim, this reduces future payment rates because the device-related costs are not captured for that service. As a result, it is important for hospitals to accurately reflect all procedure costs in insurance claims charges, including device cost, using the appropriate C-code, where applicable in conjunction with revenue code 278 Medical/Surgical Supplies and Devices – Other Implant.

Medicare does not have a C-code category for every Boston Scientific Urology and Women's Health product.

Medicare hospital outpatient ambulatory payment classifications (APCs)

APCs refer to the groupings of procedure codes under the hospital outpatient payment system that was made effective on August 1, 2000. This system, mandated by federal law to replace the former retrospective cost-based reimbursement system, utilizes pre-set, uniform payments for each procedure grouped within a given APC. APCs cluster outpatient procedures into groups based on comparable resource use and clinical similarities. APCs pertain to Medicare outpatient services only and have no bearing on Medicare inpatient or physician reimbursement.

Important – please note

Health economic and reimbursement information provided by Boston Scientific Corporation is gathered from third-party sources and is subject to change without notice as a result of complex and frequently changing laws, regulations, rules, and policies. This information is presented for illustrative purposes only and does not constitute reimbursement or legal advice. Boston Scientific encourages providers to submit accurate and appropriate claims for services. It is always the provider's responsibility to determine medical necessity, the proper site for delivery of any services, and to submit appropriate codes, charges, and modifiers for services rendered. It is also always the provider's responsibility to understand and comply with Medicare national coverage determinations (NCD), Medicare local coverage determinations (LCD), and any other coverage requirements established by relevant payers which can be updated frequently. Boston Scientific recommends that you consult with your payers, reimbursement specialists, and/or legal counsel regarding coding, coverage, and reimbursement matters. Boston Scientific does not promote the use of its products outside their FDA approved label. Information included herein is current as of January 2025 but is subject to change without notice.

Ordering information

All orders should be placed directly with Customer Service by mail or telephone to:

Boston Scientific Corporation
Attn: Customer Service
500 Commander Shea Blvd.
Quincy, MA 02171

For phone orders call: 1.888.272.1001
For fax orders call: 1.888.272.9444

Please note that the above address is our Customer Service mailing address only.

The toll-free number is available between the hours of 8:30 a.m. and 9:30 p.m. (ET) weekdays excluding national holidays.

For your convenience, Boston Scientific accepts orders by FAX. The toll-free FAX number is 1.888.272.9444.

Standing orders

Boston Scientific accepts standing orders on all products. This convenience provides you with scheduled shipments using a single purchase order. Contact Customer Database Department at 1.888.325.1060 for details. Contact Customer Service for details on ordering, pricing, and delivery.

Terms

Terms are Net 30 Days. All shipments are F.O.B. Quincy, Massachusetts. Prices are subject to change without notice.

Returned goods

Permission to return merchandise is required for all returns and may be withheld in the sole discretion of Boston Scientific. For authorization, please contact the Customer Service Returns Department for a Return Goods Authorization (RGA) number at 1.800.862.1284.

The request for authorization must include:

- Reason for the return
- Order number, lot number, quantity
- Purchase order number, Boston Scientific invoice number, date of invoice

A copy of the packing slip or invoice must accompany all merchandise returned to Boston Scientific. The Returned Goods Authorization (RGA) number must be clearly marked on the shipping container. Merchandise returned without an RGA number will not be accepted or considered returned for purposes of the warranty.

500 Commander Shea Blvd., Quincy, MA 02171

Specification changes

As we are continually improving our products, the equipment supplied may not agree in all details with the description and specifications shown in the catalog and/or price list. All prices and specifications are subject to change without notice.

Boston Scientific Corporation makes no warranties, express or implied, including but not limited to, any implied warranty of merchantability or fitness for a particular purpose, except as specifically set forth in the product labeling supplied with each device.

Regulatory

Boston Scientific distributes products in compliance with relevant regulations.

Boston Scientific acquired the global surgical business of Lumenis Ltd. Some registered names of products manufactured and sold by Boston Scientific may contain the term "Lumenis." Lumenis is a registered trademark of Lumenis Be.

Caution: U.S. Federal law restricts these devices to sale by or on the order of a physician. Please refer to package insert provided with the product for complete Indications for Use, Contraindications, Warnings, Precautions, Adverse Events, and Instructions.

The VersaVue™ Single-Use Flexible Cystoscope and Tablet is manufactured by Medimaging Integrated Solution, Inc. and distributed by Boston Scientific Corporation. The VersaGrasp Single-Use Grasping Forceps is manufactured by Anrei Medical (HZ) Co., Ltd. and distributed by Boston Scientific Corporation.

Swiss LithoClasT® Trilogy Max Lithotripter is manufactured by E.M.S. Electro Medical Systems S.A. and distributed by Boston Scientific Corporation.

Warning regarding single-use devices

Products marked as "single use" are for single use only. Do not reuse, reprocess, or resterilize single-use products. Reuse, reprocessing, or resterilization may compromise the structural integrity of the device and/or lead to device failure which in turn may result in patient injury, illness, or death. Reuse, reprocessing, or resterilization may also create a risk of contamination of the device and/or cause patient infection or cross-infection, including, but not limited to, the transmission of infectious disease(s) from one patient to another. Contamination of the device may lead to injury, illness, or death of the patient. Boston Scientific Corporation assumes no liability with respect to instruments reused, reprocessed, or resterilized and makes no warranties, express or implied, including, but not limited to, any implied warranties of merchantability or fitness for a particular purpose, with respect to any such instrument.
