Sensor™
Nitinol Guidewire with Hydrophilic Tip
The gold standard in guidewires.
The only guidewire that really counts.

Because no other hybrid guidewire offers the reliability and confidence that you need in the OR.

---

Sensor Guidewire has been identified in more than... 170+ PUBLICATIONS and demonstrated clinical performance in multiple independent studies.1

Boston Scientific is the leader in flexible ureteroscopy for kidney stone removal.3

Hydrophilic Flexible Tip facilitates passage beyond obstructions and negotiates tortuous anatomy

Distal Tip Stiffness Profile Transition creates a unique distribution of force, to help advance past tortuous anatomy and impacted stones.16

Tungsten-filled Radiopaque Tip enhances fluoroscopic visualization

Nitinol Core offers a kink-resistant shaft for enhanced control

Flat Wire Stainless Steel Construction provides a stiff guidewire designed for enhanced instrumentation and device placement

The Coil-to-Core Design provides direct tactile feedback which helps communicate movement of the wire back to the surgeon.1

PTFE Coating designed for tactile feedback and offers a smooth wire surface to facilitate advancement and device tracking

---

If you laid all the Sensor Guidewires sold end-to-end, they would stretch from Boston, Massachusetts, to Perth, Australia.1

#1 TOP-SELLING HYBRID GUIDEWIRE globally for over two decades, with...

13+ MILLION Sensor Guidewires sold.1

170+ PUBLICATIONS

20+ FOR OVER YEARS

78 COUNTRIES

7,500+ HOSPITALS ACROSS...
Sensor™ Nitinol Guidewire with Hydrophilic Tip

Unit: Box 5

“So it really is a testament to how well designed the product was and the fact that it day in, day out helps you accomplish what you need to accomplish endoscopically. It gets you the access that you need safely. It gives you the dynamics that help you dilate and get to the stone, and it maintains your access in an atraumatic fashion. It really was a well-designed product and that’s why it’s been the go-to wire for a lot of urologists for over a decade now.”

Harrison Mitchell Abrahams, MD
USMD Health Systems, Arlington, TX

“We believe that to achieve safe access to the urinary system, the Sensor Dual Flex Guidewire might be preferable because of its non-injurious tip and more lubricious shaft.”

“We believe that to achieve safe access to the urinary system, the Sensor Dual Flex Guidewire might be preferable because of its non-injurious tip and more lubricious shaft.”

“The more flexible tip of the Sensor may provide an advantage for maneuvering around occluding obstructions in tight spots.”
