

A photograph of two surgeons in a sterile operating room. They are wearing blue surgical scrubs, blue bouffant caps, and white surgical masks. The surgeon in the foreground is looking intently to the right. The background is bright and slightly out of focus, suggesting a window or bright lights in the OR.

LithoVue Empower™
Retrieval Deployment Device

Take control

Put control in the right hand...or the left.

The LithoVue Empower™ Retrieval Deployment Device takes stone removal procedures to the next level. The critical task of controlling the basket is now in the surgeon's hand while seamlessly integrating with our LithoVue™ Ureteroscope and nitinol baskets.

Discover a revolutionary way to streamline basketing from start to finish.

Keep good form.

The LithoVue Empower Device fits our LithoVue™ Single-Use Digital Flexible Ureteroscope and nitinol baskets without adding muscular workload to your procedure.¹

A better OR experience for everyone.

Communication

Good communication is a cornerstone in any OR. Turning a two-person task into a one-person operation eliminates the chance of miscommunication during stone basketing.

Control

Eliminate the need to coordinate with an assistant during stone retrieval.

Time

Time is a valuable resource – especially in the OR. Now you can retrieve stones single handedly without compromising time.

A bench study demonstrated that stone basketing time with the LithoVue Empower Device was similar to basketing with two surgeons, and was significantly improved as compared to single surgeon basketing.¹

Maximize the value of the LithoVue™ Ureteroscope

The LithoVue Empower™ Retrieval Deployment Device works with our LithoVue™ Ureteroscope. Now you can turn your trusted LithoVue Ureteroscope into a physician-controlled retrieval device.

Integrate seamlessly

Compatible with Boston Scientific's Zero Tip™, Dakota™, Escape™ and Graspit™ Nitinol Retrieval Devices.
