**Arachnoiditis**

**Chiropractor**  
**Chronic Trunk Pain**

**Neurosurgeon**

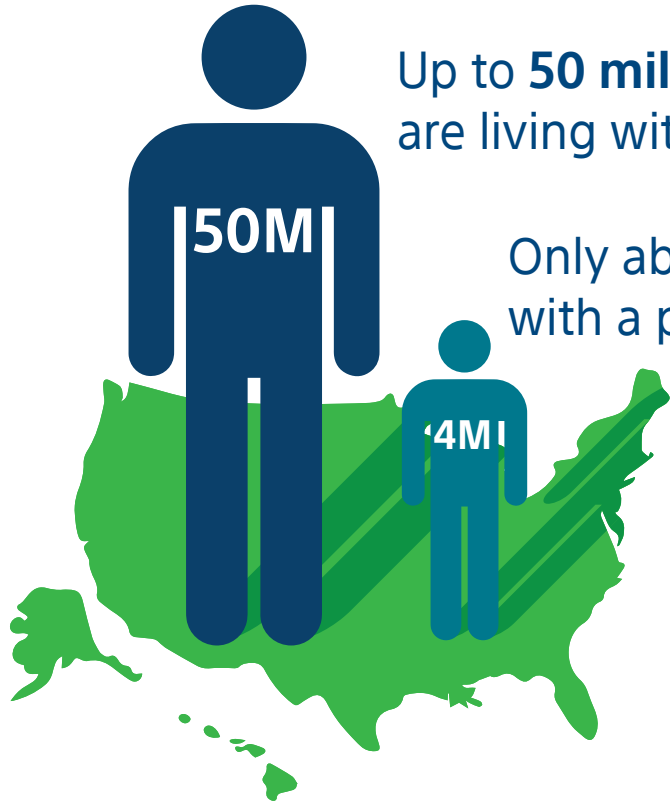

**Internist**

# Help Your Patients Find Relief From Pain

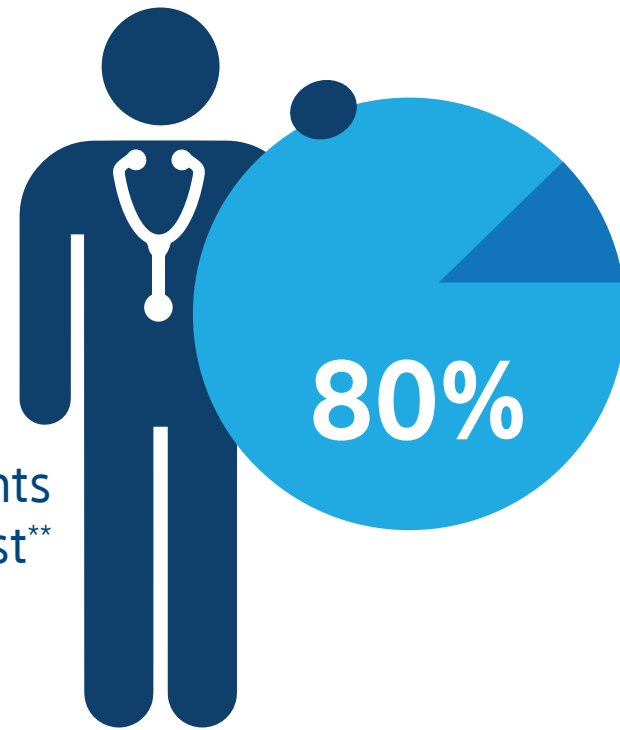

Helping chronic pain patients find safe, effective, long-term relief is an urgent challenge for medical practices today.

Up to **50 million** Americans are living with chronic pain<sup>1</sup>

Only about **4 million** are with a pain management specialist\*

**80%** of chronic pain patients have never been to a pain specialist\*\*

## Pain is a complicated condition to treat

Long-term opioid dependence is a public health crisis, and identifying reliable partners can be difficult

# How Boston Scientific Can Help: Education and Pain Management Liaison

Boston Scientific is a global leader in providing lasting, drug-free solutions for patients living with chronic pain. With dedicated educational tools and resources, our Pain Management Liaisons can help drive awareness of different interventional therapies among your patients and facilitate chronic pain liaisons with interventional pain specialists in your area.

Your local Pain Management Liaison can provide expert support and assistance to help you:

## Educate your staff and patients

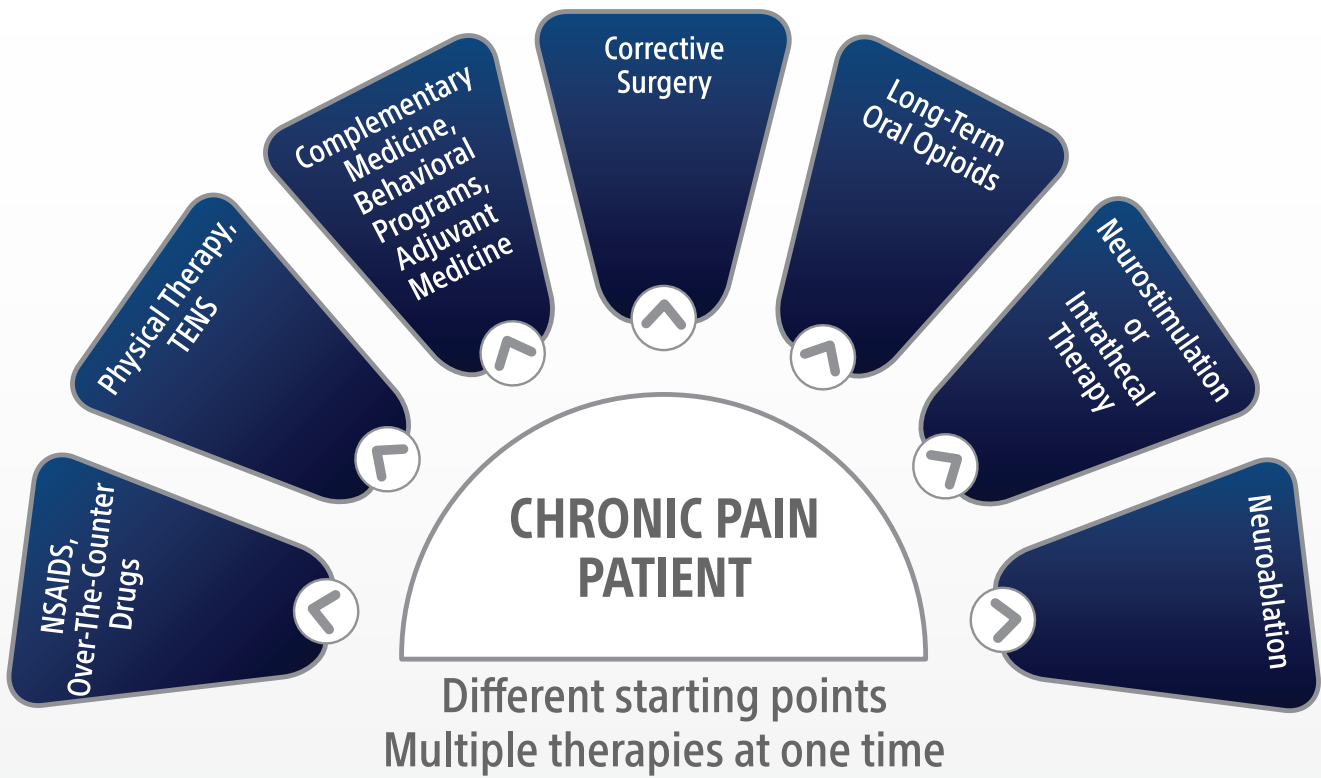

- Explain non-opioid pain solutions to your staff and patients
- Conduct events to educate patients on interventional pain management options
- Identify and connect patients who may benefit from a pain specialist consultation

## Connect with local pain specialists

- Identify local practices specializing in interventional pain solutions
- Assist your referral coordinators in getting patients connected more quickly and efficiently
- Track your referred patients' progress and success
