THE VALLEY HOSPITAL LMR Experience

HOSPITAL OVERVIEW

- Community Hospital in Ridgewood, NJ
- 450 beds
- 3 implanters: all EPs
- 100 procedures annually
- Suburban area
- Non-academic center

CHALLENGES

- Difficult to get patients to undergo pre-procedure TEE imaging
- Suboptimal transseptal puncture necessitating a repeat puncture at alternate site

OUTCOMES

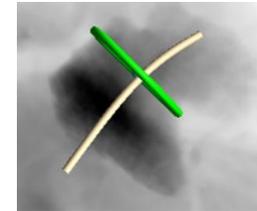

- Pre-procedural planning led to higher procedural completion rate and faster procedure times
- Increased daily procedures from 4 to 6
- Optimal transseptal placement for every patient identified before the procedure
- Reduced transseptal recross rate. No recrosses needed post-implementation of WATCHMAN TruPlan

SUMMARY

33% Decrease in Procedural Time

50% Increase in capacity & procedures per day

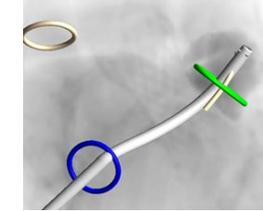

EXPECTATION VS. REALITY: FLUOROSCOPIC IMAGES

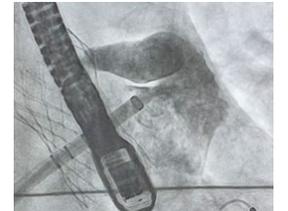

LAA Morphology (CT)

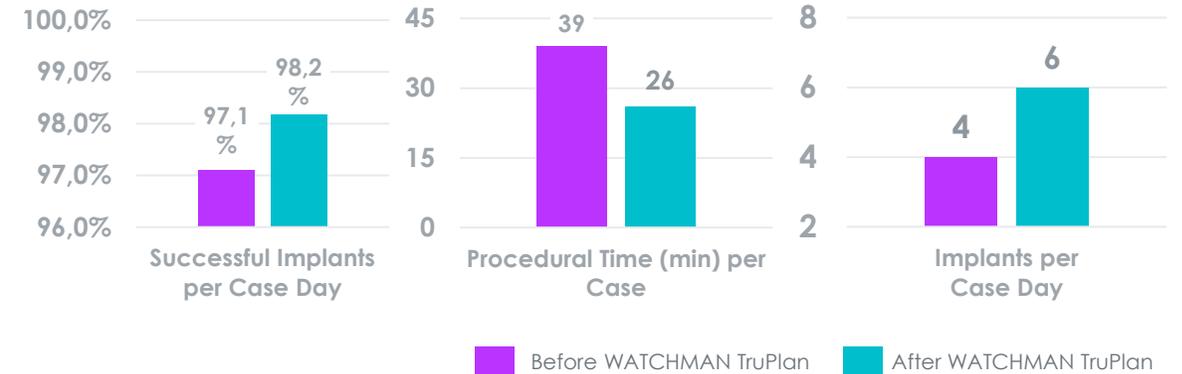

LAA Morphology (Fluoro)

Optimal TS Puncture

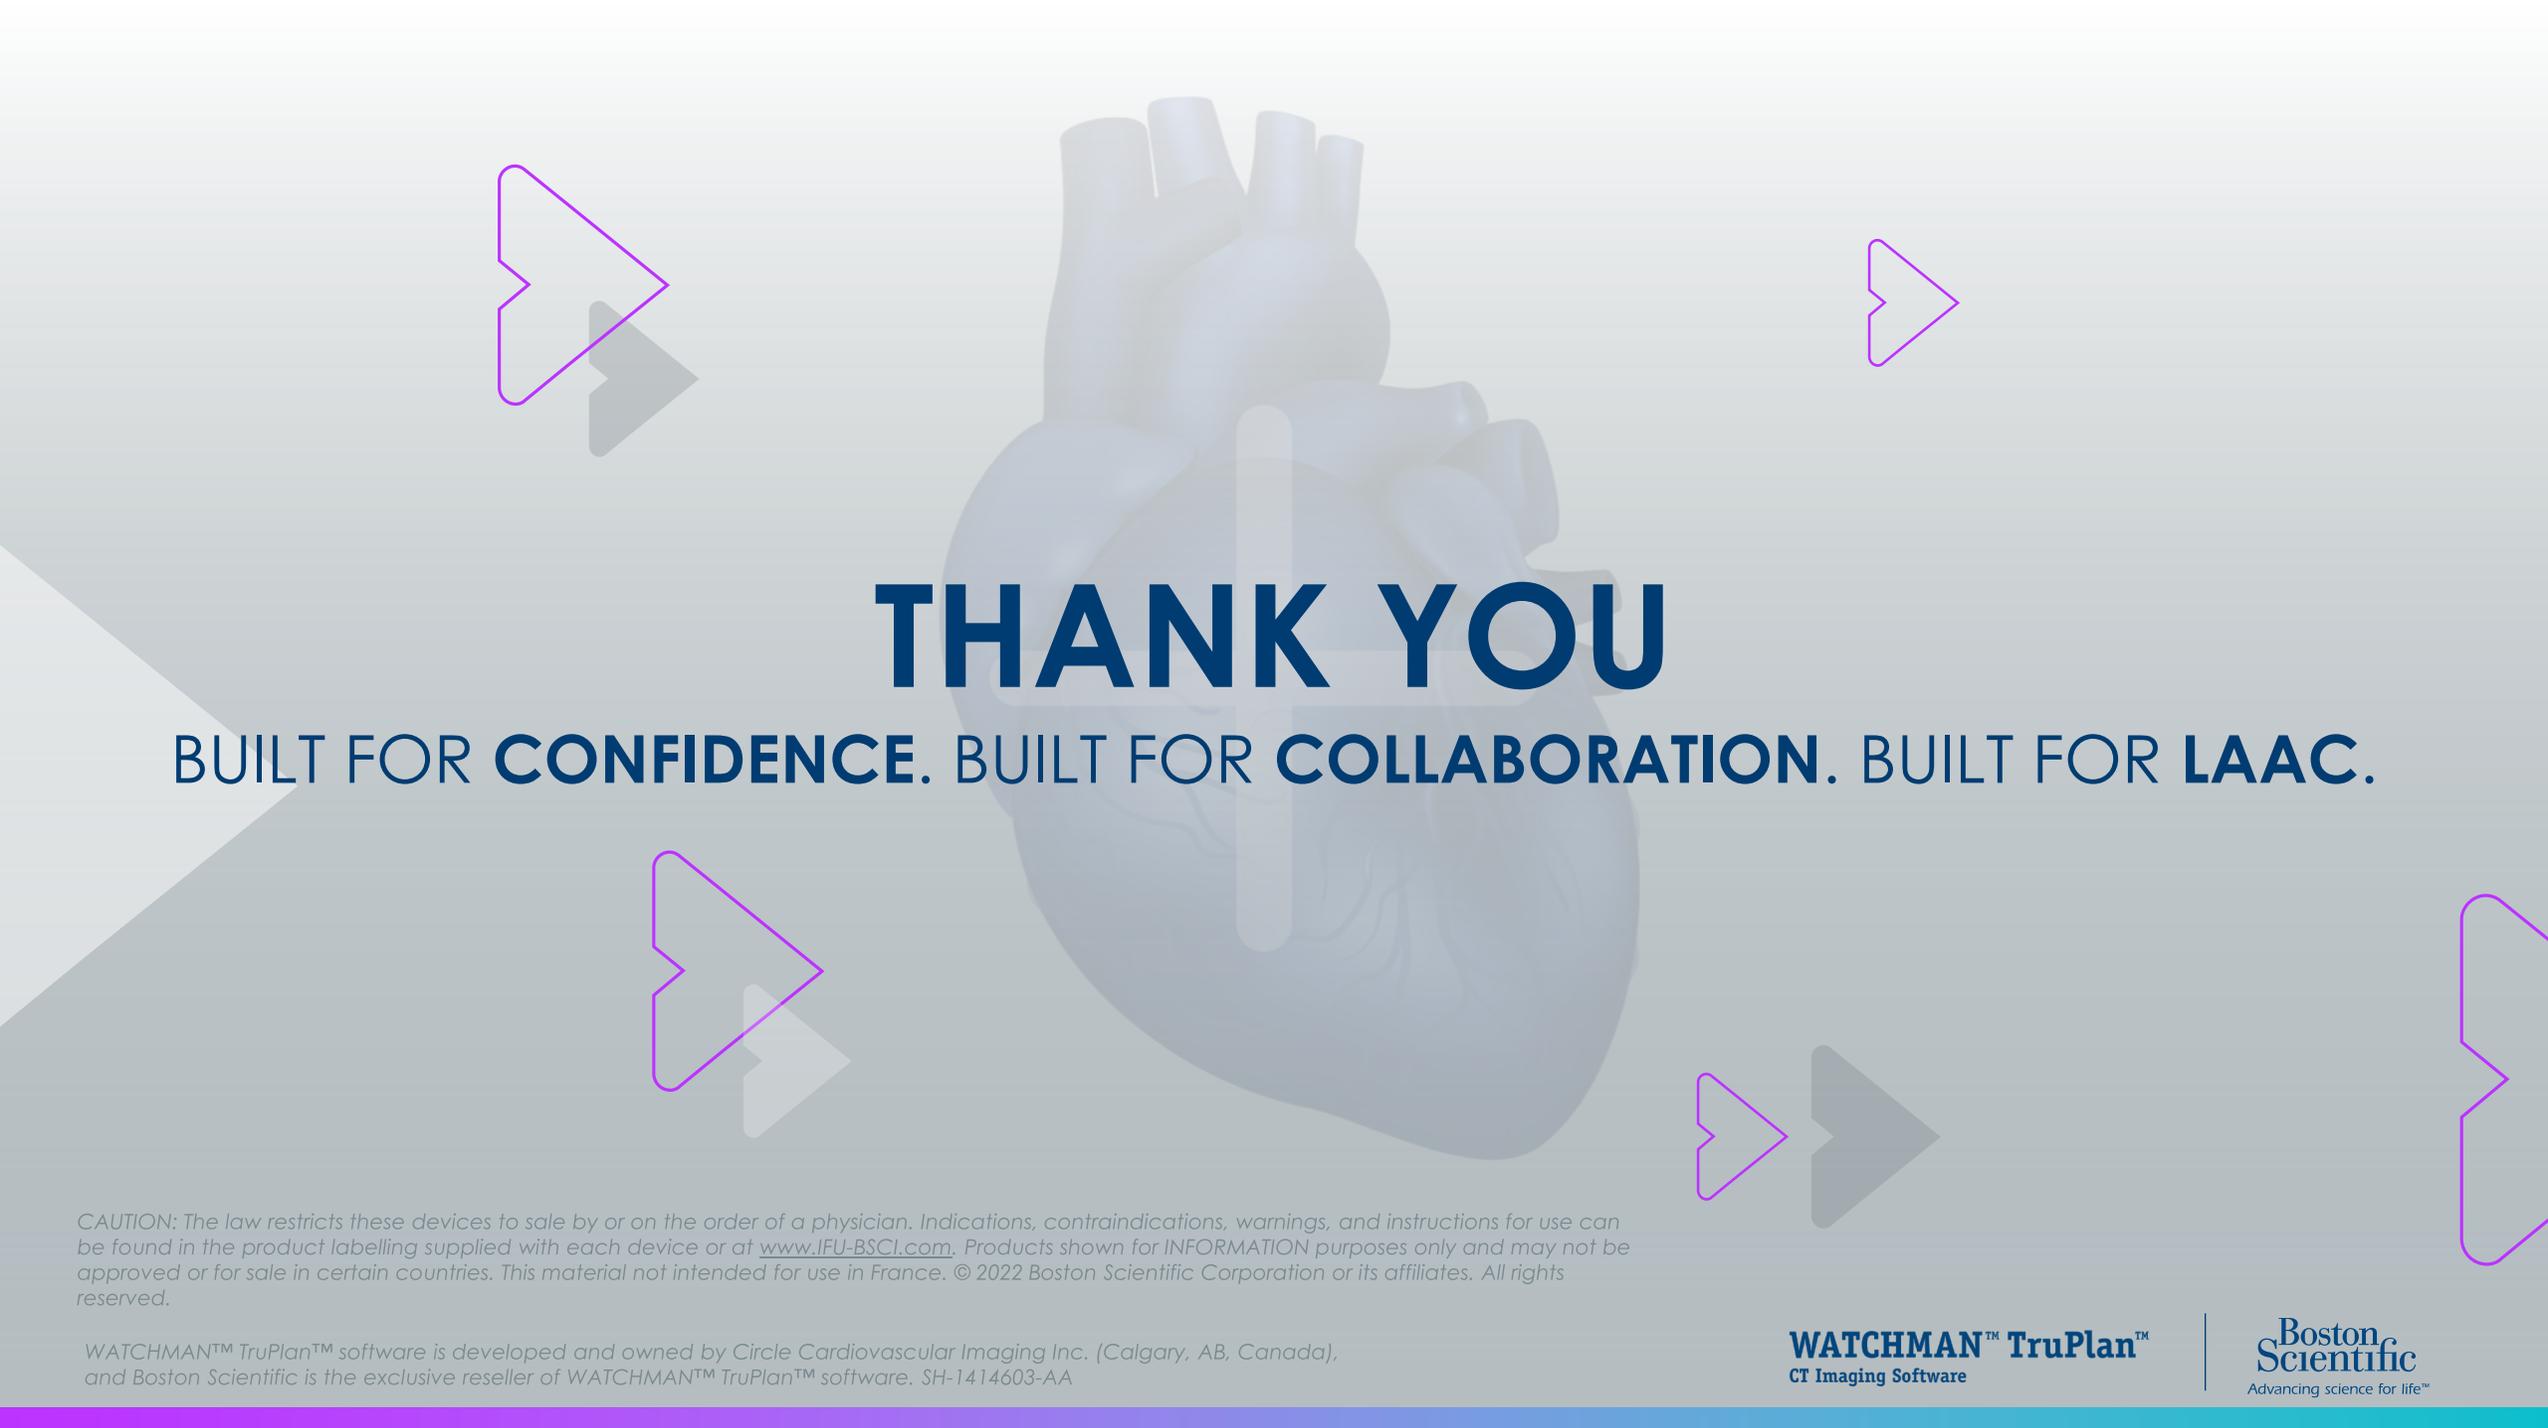

WATCHMAN FLX™
Left Atrial Appendage Closure Device

"It helped guide our procedure, where to perform the optimal transseptal puncture, which delivery system to use, which size WATCHMAN device to use. We got an optimal result, and this is how we now approach patients who need a WATCHMAN device."

Suneet Mittal, MD, Director, Electrophysiology at The Valley Hospital
